QUESTION PAPER SERIES CODE

| Registration No. : | | | | |
|-----------------------|------|------|--------------|---|
| Centre of Exam. : | | | | |
| Name of Candidate : _ | | | | · |
| | | | | |

Signature of Invigilator

COMBINED ENTRANCE EXAMINATION, 2017

M.V.Sc. ANIMAL BIOTECHNOLOGY

[Field of Study Code : MVS]

Time Allowed: 3 hours

Maximum Marks: 240

INSTRUCTIONS FOR CANDIDATES

Candidates must read carefully the following instructions before attempting the Question Paper:

- Write your Name and Registration Number in the space provided for the purpose on the top of this Question Paper and in the Answer Sheet.
- (ii) Please darken the appropriate Circle of Question Paper Series Code on the Answer Sheet.
- (iii) The Question Paper is divided into two Parts: Part—A and Part—B. Both Parts have multiple-choice questions. All answers are to be entered in the Answer Sheet provided with the Question Paper for the purpose.
- (iv) Part—A consists of 60 questions and all are compulsory. Answer all the questions in the Answer Sheet provided for the purpose by darkening the correct choice, i.e., (a) or (b) or (c) or (d) with BALLPOINT PEN only against each question in the corresponding circle. Each correct answer carries 1 mark. There will be negative marking and 1/2 mark will be deducted for each wrong answer.
- (v) Part—B consists of 100 questions. Answer any 60 questions in the Answer Sheet by darkening the correct choice, i.e., (a) or (b) or (c) or (d) with BALLPOINT PEN only against the corresponding circle. Each correct answer carries 3 marks. There will be negative marking and 1 mark will be deducted for each wrong

In case any candidate answers more than the required 60 questions, the first 60 questions attempted will be evaluated.

- (vi) Answer written by the candidates inside the Question Paper will not be evaluated.
- (vii) Calculators and Log Tables may be used.
- (viii) Pages at the end have been provided for Rough Work.
- (ix) Return the Question Paper and Answer Sheet to the Invigilator at the end of the Entrance Examination. DO NOT FOLD THE ANSWER SHEET.

INSTRUCTIONS FOR MARKING ANSWERS

- 1. Use only Blue/Black Ballpoint Pen (do not use Pencil) to darken the appropriate Circle.
- 2. Please darken the whole Circle.
- 3. Darken ONLY ONE CIRCLE for each question as shown in example below :

| Wrong | Wrong | Wrong | Wrong | Correct |
|-------|---------------|----------------|--------------------------|---------|
| 0000 | \$ 600 | Ø 60 60 | $\Theta \Theta \Theta O$ | @ @ O |

- 4. Once marked, no change in the answer is allowed.
- 5. Please do not make any stray marks on the Answer Sheet.
- 6. Please do not do any rough work on the Answer Sheet.
- 7. Mark your answer only in the appropriate space against the number corresponding to the question.
- 8. Ensure that you have darkened the appropriate Circle of Question Paper Series Code on the Answer Sheet.

PART-A

Answer all questions

| 1 . 7 | he graph | between | the | unbalanced | force | and | acceleration | is |
|--------------|----------|---------|-----|------------|-------|-----|--------------|----|
|--------------|----------|---------|-----|------------|-------|-----|--------------|----|

- (a) straight line
- (b) hyperbola
- (c) parabola
- (d) irregular line

2. A battery of e.m.f. E has an internal resistance r. A variable resistance R is connected to the terminals of the battery. A current I is drawn from the battery. V is the terminal PD. If R alone is gradually reduced to zero, which of the following best describes I and V?

- (a) I approaches E/r, V approaches E
- (b) I approaches infinity, V approaches E
- (c) I approaches E/r, V approaches zero
- (d) I approaches zero, V approaches E

3. When KE_{max} of photoelectrons is zero, then frequency of incident photon relative to threshold is

- (a) less
- (b) greater
- (c) smaller
- (d) equal

4. A bar magnet is equivalent to

- (a) solenoid carrying current
- (b) circular coil carrying current
- (c) toroid carrying current
- (d) straight conductor carrying current

5. How many numbers of electrons will be present in current of 1 coulomb charge?

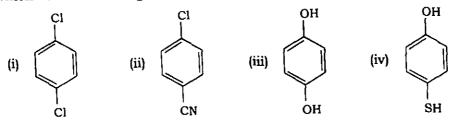

- (a) 1000
- (b) 1×10^5
- (c) 6×10^{18}
- (d) 6.02×10^{18}

| 6. | The f | orce between two point charges varies inversely with respect to |
|-----|-------|---|
| | (a) | distance between them |
| | (b) | square of distance between them |
| | (c) | square root of the distance between them |
| | (d) | cube of the distance between them |
| 7. | The | magnetic field of different sources is the vector addition of |
| | (a) | magnetic field of any two sources |
| | (b) | magnetic field of all individual sources |
| | (c) | magnetic field of two strongest sources |
| | (d) | magnetic field of two weakest sources |
| 8. | The | substances that are diamagnetic have a tendency to |
| | (a) | move from stronger to weaker magnetic field |
| | (b) | move from weaker to stronger magnetic field |
| | (c) | remain static in the magnetic field |
| | (d) | develop high charge |
| 9. | The | substances that become highly magnetic when placed in a magnetic field are called |
| | (a) | diamagnetic |
| | (b) | paramagnetic |
| | (c) | ferromagnetic |
| | (d) | supermagnetic |
| 10. | The | Pascal's law states that pressure in a fluid at rest is |
| | (a) | same at all points if they are at same height |
| | (b) | different at all points if they are at same height |
| | (c) | there is no relation between pressure and height |
| | (d) | pressure decreases exponentially with height |
| | | |

| 11. | The | coefficient of viscosity for a fluid is |
|-----|------|---|
| | (a) | shearing stress/strain rate |
| | (b) | strain rate/shearing stress |
| | (c) | (strain rate) ² /shearing stress |
| | (d) | (10 × strain rate)/shearing stress |
| 12. | Whi | ch of the following particles would be having highest surface energy? |
| | (a) | Nanoparticles |
| | (b) | Microparticles |
| | (c) | Macroparticles with size 1 to 10 μm |
| | (d) | Macroparticles with size 10 to 100 μm |
| 13. | The | detergents added to oil in water interphase |
| | (a) | increase the surface tension |
| | (p) | decrease the surface tension |
| | (c) | decrease the wetting surface |
| | (d) | make the surface tension zero |
| 14. | Acc | ording to Boyle's law, at constant temperature of a gas |
| | (a) | the product of pressure and volume is always unity |
| | (b) | the product of absolute pressure and volume is constant |
| | (c) | the product of pressure and volume is proportional to molecular weight of gas molecules |
| | (d) | the product of charge and distance between them is constant |
| 15. | If a | substance is in the form of a long rod, then for small change in temperature ΔT |
| | (a) | is directly proportional to fractional change in length |
| | (b) | is inversely proportional to fractional change in length |
| | (c) | is directly proportional to original length |

(d) is inversely proportional to original length

16. For which of the following molecules significant $\mu \neq 0$?

- (a) Only (i)
- (b) (i) and (ii)
- (c) (iii) and (iv)
- (d) Only (iii)

17. The water is polar, because of

- (a) having completely negative oxygen atom
- (b) having completely positive hydrogen atom
- (c) having partially negative oxygen and partially positive hydrogen
- (d) having completely uncharged hydrogen and oxygen atoms

18. Which of the following chemical groups is non-polar in nature?

- (a) CH₃ groups
- (b) OH groups
- (c) Amino groups
- (d) COOH groups

19. According to second law of thermodynamics, in all natural processes

- (a) entropy increases
- (b) entropy decreases
- (c) entropy remains unchanged
- (d) entropy becomes zero

20. The passive movement of molecules from higher to lower concentration across the semipermeable membrane is pursuance of

- (a) first law of thermodynamics
- (b) second law of thermodynamics
- (c) third law of thermodynamics
- (d) None of the above

| 21. | In ic | eal solutions, the enthalpy of mixing of the pure components to form the solution is | | | | | | |
|-----|--------|---|--|--|--|--|--|--|
| | (a) | negative | | | | | | |
| | (b) | positive | | | | | | |
| | (c) | zero | | | | | | |
| | (d) | Value depends on the temperature | | | | | | |
| 22. | The as | solutions that obey Raoult's law over the entire range of concentration are known | | | | | | |
| | (a) | non-ideal solutions | | | | | | |
| | (b) | ideal solutions | | | | | | |
| | (c) | suspension | | | | | | |
| | (d) | colloids | | | | | | |
| 23. | The | lowering of vapour pressure of a solvent depends only on the | | | | | | |
| | (a) | concentration of solute particles | | | | | | |
| | (b) | identity of solutes | | | | | | |
| | (c) | identity of solvent | | | | | | |
| | (d) | identity of mixing vessel | | | | | | |
| 24. | | electrical resistance of any object is directly proportional to its length and inversely portional to | | | | | | |
| | (a) | atmospheric pressure | | | | | | |
| | (b) | cross-sectional area | | | | | | |
| | (c) | voltage | | | | | | |
| | (d) | atmospheric temperature | | | | | | |
| 25. | The | conductance of an electrolytic solution is equal to the | | | | | | |
| | (a) | reciprocal of resistance | | | | | | |
| | (b) | reciprocal of cross-sectional area | | | | | | |
| | (c) | reciprocal of temperature | | | | | | |
| | (d) | reciprocal of concentration of electrolyte | | | | | | |
| | | | | | | | | |

| 26. | | rate of reaction of reactants A and B is given as rate = $k[A]^{1/2}[B]^{3/2}$. The order of reaction will be | | | | | |
|-----|-----|---|--|--|--|--|--|
| | (a) | 1 | | | | | |
| | (b) | 2 | | | | | |
| | (c) | 3 | | | | | |
| | (d) | 4 | | | | | |
| 27. | Whe | en the hydrogen ion concentration is increased 100 times, the pH will be changed by | | | | | |
| | (a) | 100 units | | | | | |
| | (p) | 10 units | | | | | |
| | (c) | 5 units | | | | | |
| | (d) | 2 units | | | | | |
| | | | | | | | |
| 28. | | variation in the amount of gas absorbed by the adsorbent with pressure at constant perature can be expressed by means of curve termed as | | | | | |
| | (a) | adsorption homeotherm | | | | | |
| | (b) | absorption isotherm | | | | | |
| | (c) | absorption polytherm | | | | | |
| | (d) | Freundlich isotherm | | | | | |
| 29. | The | Tyndall effect is observed in | | | | | |
| | (a) | colloids | | | | | |
| | (b) | few solutions | | | | | |
| | (c) | suspension | | | | | |
| | (d) | all solutions | | | | | |
| 20 | m1 | | | | | | |
| 30. | | dispersion of finely divided oil droplets in water is called | | | | | |
| | (a) | oil in water emulsion | | | | | |
| | (b) | water in oil emulsion | | | | | |
| | (c) | oil in water solution | | | | | |
| | (d) | water in oil solution | | | | | |

| | (a) | aerobic bacteria |
|----------|-----|--|
| | (b) | anaerobic bacteria |
| | (c) | aerobic fungus |
| | (d) | anaerobic fungus |
| | | |
| 32. | The | endoplasmic reticulum is absent in |
| | (a) | yeast |
| | (b) | Salmonella typhi |
| | (c) | Plasmodium species |
| | (d) | mammalian red blood cells |
| | | |
| 33. | | ch of the following cells is without nucleus? |
| | (a) | Neutrophils |
| | (p) | Eosinophils |
| | (c) | Macrophages |
| | (d) | Erythrocytes |
| | , , | |
| 34. | | ONA, the adenine forms the base pairing with |
| | (a) | thiamine |
| | (b) | uracil |
| | (c) | cytosine |
| | (d) | guanine |
| 35. | Δno | art from nucleus, which organelle possesses the DNA in eukaryotes? |
| . | _ | |
| | (a) | Lysosome |
| | (b) | Endoplasmic reticulum |
| | (c) | Endosomes |
| | (d) | Mitochondria |
| | | |

31. The mitochondria evolved from

| 36. | chi | sickle-cell anemia, the mutation in beta-globin gene that is located on romosome 11 causes a glutamic acid to valine change at position 6 of the protein. is mutation is an example of |
|-----------------|------------|--|
| | (a) | frameshift mutation |
| | (b) | missense mutation |
| | (c) | nonsense mutation |
| | (d) | chromosomal abnormality |
| 37. | Wł | nich of the following nucleotides acts as an energy currency for all organisms? |
| | (a) | ATP |
| | (b) | CTP |
| | (c) | UTP |
| | (d) | TTP |
| 38. | The | e compound that is synthesized by liver having surfactant activity is |
| | (a) | albumin |
| | (b) | globulin |
| | (c) | bile |
| | (d) | ferritin |
| 39. | The | simplest amino acid is |
| | | proline |
| | (b) | glycine |
| | (c) | methionine |
| | (d) | tryptophan |
| 1 0. | The | scientific name of Indian cattle is |
| | (a) | Bos taurus |
| | (b) | Bos gaurus |
| | (c) | Bos indicus |
| | (c) (d) | |
| | (4) | Bos indianensis |

| 41. | Which of the following animals is emitter of methane gas? | | | | | | |
|------------|---|--|--|--|--|--|--|
| | (a) | Horse | | | | | |
| | (p) | Dog | | | | | |
| | (c) | Pig | | | | | |
| | (d) | Cattle | | | | | |
| _ | | | | | | | |
| 12. | | carboxylhaemoglobin is | | | | | |
| | (a) | carbon monoxide bound to haemoglobin | | | | | |
| | (b) | carbon dioxide bound to haemoglobin | | | | | |
| | (c) | haemoglobin attached to carboxyl group of an amino acid | | | | | |
| | (d) | haemoglobin surrounded by 20 molecules of carbon dioxide | | | | | |
| 10 | The s | to about 1 to a second for more on all more to make below to | | | | | |
| I3. | | bacterial organisms present in rumen of ruminants belong to | | | | | |
| | (a) | eubacteria | | | | | |
| | (p) | archeobacteria | | | | | |
| | (c) | enterobacteriaceae | | | | | |
| | (d) | ruminae | | | | | |
| 14. | The | viruses that infect the bacteria are called | | | | | |
| | | phages | | | | | |
| | (b) | retroviruses | | | | | |
| | (c) | endoviruses | | | | | |
| | (d) | Baculoviruses | | | | | |
| | | | | | | | |
| 15. | Whie | ch of the following bacteria is spore-forming bacteria? | | | | | |
| | (a) | Salmonella typhimurium | | | | | |
| | (b) | E. coli | | | | | |
| | (c) | Bacillus anthracis | | | | | |
| | (d) | Brucella abortus | | | | | |
| | | | | | | | |

41.

| 46. | The | function cos(sin x) is |
|-----|-----|---|
| | (a) | even |
| | (p) | odd |
| | (c) | even and odd |
| | (d) | neither even nor odd |
| 47. | | ard is drawn from a pack of 52 cards, then what is the probability that it is a quee red colour? |
| | (a) | 1/52 |
| | (b) | 1/26 |
| | (c) | 1/13 |
| | (d) | 1/4 |
| | | |
| 48. | The | function $t(x) = x-1 + x-2 $ is differentiable at |
| | (a) | 1 <i>R</i> – {1} |
| | (b) | 1 <i>R</i> – {2} |
| | (c) | $1R - \{1, 2\}$ |
| | (d) | 1 <i>R</i> |
| 49. | The | probability of 53 Sundays in non-leap year is |
| | (a) | 2/7 |
| | (b) | 1/7 |
| | (c) | 3/7 |
| | (d) | 4/7 |
| 50. | The | image of the point (1, 2) with respect to the line $x + y = 4$ is |
| | (a) | (1, 4) with respect to the line $x + y = 4$ is |
| | (b) | (2, 4) |
| | (c) | (3, 4) |
| | (d) | (4, 1) |
| | ,, | 1.7 -1 |

| 51. | The | curve | $y = x^2$ | -2x + | 1 | is | a | 'an |
|-----|-----|-------|-----------|-------|---|----|----|-----|
| | | | 7 ~ | | 4 | 10 | ., | W. |

- (a) parabola with vertex (1, 0)
- (b) parabola with vertex (0, 1)
- (c) ellipse
- (d) hyperbola

52. The domain of $\tan - 1x$ is

- (a) (·∞,∞)
- (b) $(-\pi, \pi/2)$
- (c) $(-\pi/2, \pi/2)$
- (d) $(0, \pi)$
- on a particular day that the cost of production of each manure bags in a day. It was observed than twice the number of manure bags produced on that day. If the total cost of production on that day was 7 90, find the number of manure bags produced and the cost of each manure bag.
 - (a) 3 and ₹ 30
 - (b) 4 and ₹ 20
 - (c) 6 and ₹ 15
 - (d) 5 and ₹ 18

54. Mode is

- (a) middle-most value
- (b) most frequent value
- (c) least frequent value
- (d) average value
- **55.** Jadeja scores runs in 10 consecutive innings as 38, 70, 48, 34, 42, 55, 63, 46, 54 and 44. The mean deviation about mean is
 - (a) 8.6
 - (b) 6·4
 - (c) 10.6
 - (d) 7.6

| 56. | The | figure formed by the lines $ax \pm by \pm c = 0$ is |
|-----|-------|---|
| | (a) | a rectangle |
| | (b) | a square |
| | (c) | a rhombus |
| | (d) | a triangle |
| 57. | and | students appeared for two examinations. 60 passed the first, 50 passed the second 30 passed both. Find the probability that a student selected at random has passed east one examination. |
| | (a) | 4/5 |
| | (b) | 1/4 |
| | (c) | 2/3 |
| | (d) | 3/4 |
| 58. | Wh | ich of the following is not a measure of central tendency? |
| | (a) | Standard deviation |
| | (b) | Mode |
| | (c) | Mean |
| | (d) | Median |
| 59. | ran | in experiment tubes numbered 1 to 20 are mixed up and then the tube is drawn a dom. What is the probability that the tube drawn bears a number which is a tiple of 3? |
| | (a) | 1/5 |
| | (b) | 2/5 |
| | (c) | 3/10 |
| | (d) | 3/5 |
| 60. | If th | ne difference of mode and median of a data is 24, then the difference of median and in |
| | (a) | 12 |
| | (b) | 24 |
| | (c) | 8 |
| | (d) | 36 |
| | | |

PART-B

Answer any sixty questions

| 51. | The | carbohydrate having 4 chiral centres can have number of stereoisomers. |
|-----|------|---|
| | (a) | 18 |
| | (p) | 19 |
| | (c) | 20 |
| | (d) | 16 |
| | | |
| 62. | Whic | ch of the following sugar is non-reducing sugar? |
| | (a) | Lactose |
| | (b) | Glucose |
| | (c) | Fructose |
| | (d) | Sucrose |
| 63. | The | interconversion of α and β anomers of glucose in water is called |
| | (a) | mutation |
| | (b) | glucolysis |
| | (c) | mutarotation |
| | (d) | anomerization |
| 64. | Oxio | dation of carbon atom of a monosaccharide other than first carbon yields |
| | (a) | aldonic acid |
| | (b) | amino acid |
| | (c) | phosphoric acid |
| | (d) | uronic acid |
| 65. | The | frequency of branching in case of glycogen is |
| | (a) | 20–30 |
| | (p) | 3060 |
| | (c) | 1–3 |
| | (d) | 8-12 |
| | | |

| 50. | WAR | on of the following is not necesopolysaccharide: |
|-----|-----|---|
| | (a) | Glycosaminoglycan |
| | (b) | Hyaluronate |
| | (c) | Chrondoitinsulphate |
| | (d) | Dextran |
| 67. | The | lipopolysaccharides are predominant in outer-membrane of |
| | (a) | Gram-positive bacteria |
| | (b) | Gram-negative bacteria |
| | (c) | yeast cells |
| | (d) | All the mammalian cells |
| 68. | The | triacylglycerols are fatty acid esters of |
| | (a) | glucose |
| | (b) | glycerol |
| | (c) | cholesterol |
| | (d) | sphingosine |
| 69. | Whi | ch of the following lipids is linked to glycerol through ether linkage? |
| | (a) | Triglycerides |
| | (b) | Sphingolipids |
| | (c) | Plasmalogens |
| | (d) | Cholesterols |
| 70. | Whi | ch of the following amino acids is optically inactive? |
| | (a) | Tryptophan |
| | (b) | Glycine |
| | (c) | Alanine |
| | (d) | Leucine |
| | | |

| 71. | The | most rigid amino acid is | | |
|-----|---------|--|--|--|
| | (a) | glycine | | |
| | (b) | proline | | |
| | (c) | phenylalanine | | |
| | (d) | alanine | | |
| 72. | | tyrosine is more polar than phenylalanine because of presence of in its zene ring. | | |
| | (a) | amino group | | |
| | (b) | hydroxyl group | | |
| | (c) | carboxyl group | | |
| | (d) | sulphahydril group | | |
| | | | | |
| 73. | | amino acids are called acid because of presence of | | |
| | (a) | carboxyl group | | |
| | (b) | amino group | | |
| | (c) | sulphahydril group | | |
| | (d) | hydroxyl group | | |
| 74. | The | amino acids dissolved in water are said to be having amphoteric nature due to | | |
| | (a) | having both acidic and alkaline nature | | |
| | (b) | having only acidic nature | | |
| | (c) | having only alkaline nature | | |
| | (d) | having two carboxyl groups | | |
| A W | To 1 | | | |
| 75. | | isoelectric point of an amino acid is the pH at which | | |
| | (a) | the amino acids have highly positive charge | | |
| | (b) | the amino acids have negative charge | | |
| | (c) | the amino acids have no net charge | | |
| | (d) | the amino acids have slightly positive charge | | |
| | | | | |

| 76. | The o | chemical formation of peptide bond releases one |
|------|-------|--|
| , 0. | | water molecule |
| | (b) | carbon dioxide molecule |
| | (c) | ammonia molecule |
| | (d) | sulphur dioxide molecule |
| 77. | The | structure of protein describing simple sequence of amino acids is called |
| | (a) | quaternary structure |
| | (b) | tertiary structure |
| | (c) | primary structure |
| | (d) | secondary structure |
| 78. | The | e denature protein is separated electrophoretically by |
| | (a) | native PAGE |
| | (b) | SDS-PAGE |
| | (c) | denatured agarose gel electrophoresis |
| | (d) | native agarose gel electrophoresis |
| 79 | | nich of the following carbohydrates is generally used by the animal body to generatergy? |
| | (a) | Fructose |
| | (b) | Galactose |
| | (c) | Glucose |
| | (d) | Mannose |
| 80 | . Th | ne denaturation of proteins indicates |
| | (a) | destruction of primary structure of protein |
| | (b) | destruction secondary, tertiary and quaternary structure of protein |
| | (c) | refolding of proteins |
| | (d) | chemical modifications of proteins |
| | | |

| 81. | The | separation | of | proteins | in | SDS-PAGE | is | based | on |
|-----|-----|------------|----|----------|----|----------|----|-------|----|
|-----|-----|------------|----|----------|----|----------|----|-------|----|

- (a) molecular weight of protein
- (b) secondary structure of protein
- (c) tertiary structure of protein
- (d) quaternary structure of protein

82. The pocket of an enzyme molecule where the substrate molecule is called

- (a) active site
- (b) active pocket
- (c) external pocket
- (d) internal pocket

83. The formula

$$V_0 = \frac{V_{\text{max}}[S]}{K_{\text{m}} + [S]}$$

for enzyme kinetics is called

- (a) Nernst equation
- (b) Michaelis-Menten equation
- (c) Lineweaver-Burk equation
- (d) enzyme equation

84. Enzymes that add the phosphate group to a substrate are called

- (a) kinases
- (b) phosphatises
- (c) hydroxylases
- (d) ligases

85. The inactive form of vitamin D present under the skin is chemically

- (a) 1,25-dihydrocholecalciferol
- (b) dehydrocholecalciferol
- (c) 7-dehydrocholesterol
- (d) cholecalciferol

| 86. | Whic | h of the following vitamins is needed for blood coagulation: |
|-----|------|--|
| | (a) | Vitamin A |
| | (p) | Vitamin E |
| | (c) | Vitamin K |
| • | (d) | Vitamin D |
| 87. | Whi | ch of the following pathways works along with electron transport chain? |
| | (a) | Oxidative phosphorylation |
| | (b) | Krebs cycle |
| | (c) | Urea cycle |
| | (d) | Glycolysis |
| | | |
| 88. | The | difference between the ribose sugar of DNA and RNA exists in |
| | (a) | 5' carbon |
| | (p) | 3' carbon |
| | (c) | 4' carbon |
| | (d) | 2' carbon |
| 89. | The | DNA fragments formed during DNA replication in lagging strand are called |
| | (a) | primers |
| | (b) | dimers |
| | (c) | Okazaki fragment |
| | (d) | degraded fragments |
| 90. | The | high absorbance in spectrophotometry of a biological sample indicates |
| | (a) | high concentration of sample |
| | (b) | low concentration of sample |
| | (c) | degradation of sample |
| | (d) | volatile nature of sample |
| | 1 / | |

| /118 | -A | 21 | { P.T.O. |

| | (a) | Norepinephrine | |
| 95. | Whi | ich of the following hormones is released during acute stress? | |
| | (~) | C. C. Statement of Many Morney | |
| | (d) | | |
| | (c) | overhydration | |
| | (a) (b) | dehydration dehydration | |
| 94. | | intensity of colour of urine increases during | |
| 64 | fri | | |
| | (d) | by albumin | |
| | (c) | dissolved in plasma | |
| | (p) | in the form of bicarbonate | |
| | (a) | by hemoglobin | |
| 93. | The | CO ₂ is not transported in blood | |
| | (d) | Cellulose | |
| | (c) | Heteropolysaccharides linked to protein | |
| | (b) | Lipopolysaccharides | |
| | (a) | Protein | |
| 92. | | ch of the following biomolecules cannot act as antigen? | |
| | | | |
| | (d) | Liebermann method | |
| | (c) | Benedict's method | |
| | (b) | Fiske-Subbarao method | |

91. The protein in serum can be estimated spectrophotometrically by the

(a) Biuret method

| | (a) | adrenal medulla |
|-------|-----|--|
| | (p) | adrenal cortex |
| | (c) | pituitary gland |
| | (d) | hypothalamus |
| | | the control of the co |
| 97. | | milk fever in high-yielding dairy cows occurs due to |
| | (a) | hypercalcemia |
| | (p) | hypocalcemia |
| | (c) | hyperglycemia |
| | (d) | overfeeding |
| 98. | The | protein synthesis in eukaryotes occurs in |
| | (a) | nucleus |
| | (b) | inside the endoplasmic reticulum |
| | (c) | ribosomes |
| | (d) | lysosomes |
| 99. | Wh | ich of the following RNA molecules brings amino acids during protein synthesis? |
| | (a) | rRNA |
| | (b) | mRNA |
| | (c) | tRNA |
| | (d) | SnRNA |
| 100. | The | e enzyme that amplifies the DNA in polymerase chain reaction is |
| | (a) | DNA polymerase III |
| | (b) | DNA polymerase α |
| | (c) | taq polymerase |
| | (d) | RNA polymerase |

The hormone epinephrine is synthesized in

96.

| A | 23 [P.T.O. |
|-----|--|
| (d) | beta-glycosidase |
| (c) | alpha-lactamase |
| (b) | beta-lactamase |
| (a) | proteinase |
| The | enzyme synthesized by the bacteria that has the capability to degrade the penicillin |
| (d) | Nutrient agar |
| (c) | Brilliant green agar |
| (p) | Blood agar |
| (a) | EMB agar |
| Whi | ich of the following differential media can be used to diagnose genus Salmonella? |
| (d) | prion |
| (c) | capsid |
| (b) | inner membrane |
| (a) | outer membrane |
| The | outer protein covering of viruses is called |
| (d) | IMTech, Chandigarh |
| (c) | CDRI, Lucknow |
| (b) | NDRI, Karnal, Haryana |
| (a) | IVRI, Izatnagar, Bareilly |
| The | first buffalo produced through in vitro fertilization in India was in |
| (d) | specificity of any antigen |
| (c) | specificity for all epitopes of antigen |
| (b) | specificity for only one epitope of antigen |
| (a) | specificity for more than one epitope of antigen |
| | (b) (c) (d) The (a) (b) (c) (d) White (a) (b) (c) (d) The is (a) (b) (c) (d) |

101. The monoclonal antibodies are characterized by

| 106. | The | vaccine against foot and mouth disease that is currently used in India is |
|------|--------------|--|
| | (a) | DNA vaccine |
| | (b) | live vaccine |
| | (c) | killed vaccine |
| | (d) | subunit vaccine . |
| | | |
| 107. | | autoclave kills the microbes by |
| | (a) | dry heat |
| | (p) | moist heat |
| | (c) | UV rays |
| | (d) | infrared rays |
| 100 | - | |
| 108. | | preparing 100 ml of normal saline solution, 0.9 gram of NaCl will be taken and |
| | (a) | 100 ml of water will be added |
| | (b) | water will be added up to 100 ml |
| | (c) | 99.1 ml of water will be added |
| | (d) | water will be added up to 99.1 ml |
| 109. | For | long-term immunity, the antigen is injected |
| | (a) | intravenously |
| | (b) | intramuscularly |
| | (c) | subcutaneously |
| | (d) | orally |
| | | |
| 110. | Wh bac | ich of the following antibiotics prevents the formation of cell-wall in Gram-positive teria? |
| | (a) | Tetracycline |
| | (b) | Gentamicin . |
| | (c) | Ampicillin |
| | (d) | Streptomycin |
| | | |

| | (a) | infrared light |
|------|-------|---|
| | (b) | ultraviolet light |
| | (c) | microwave |
| | (d) | radio wave |
| | | |
| 112. | In rı | iminants the bypass protein is the protein, that is |
| | (a) | degraded by bacteria |
| | (b) | degraded by fungi |
| | (c) | protein that escapes the microbial degradation |
| | (d) | protein that escapes the intestinal digestion process |
| | | |
| 113. | The | crude fiber percentage in roughages is |
| | (a) | greater than 18% |
| | (b) | less than 18% |
| | (c) | less than 10% |
| | (d) | less than 5% |
| | ant. | |
| 114. | | cell-wall of Gram-positive bacteria is composed of |
| | (a) | proteoglycan |
| | (b) | peptidoglycan |
| | (c) | cellulose |
| | (d) | chitin |
| 115. | DNA | synthesis mediated by DNA polymerase takes place in |
| 113. | | |
| | (a) | G1 phase |
| | (b) | S phase |
| | (c) | G2 phase |
| | (d) | G0 phase |
| | | |

111. The chamber of laminar airflow hood is sterilized by

| 116. | India | ranks position in the world in terms of egg production. |
|----------------|--|--|
| | (a) | third |
| | (p) | first |
| | (c) | second |
| | (d) | fourth |
| 117. | | ch one is not correct relationship with regard to species and their chromosome obers? |
| | (a) | Dog-78 |
| | (b) | Cat—38 |
| | (c) | Cattle—48 |
| | (d) | Buffalo-48 |

| 118. | | ploidy level after colchicine treatment |
| | (a) | will increase |
| | (b) | will decrease |
| | (c) | does not change |
| | (d) | Cannot say |
| 119. | 19. Which of the following types of bond does not exist in double-stranded DNA a temperature? | |
| | (a) | Phosphodiester bond |
| | (b) | Glycosidic bond |
| | (c) | Hydrogen bond |
| | (d) | Covalent bond |
| 120. | En. | relegad vimose enten into la compania |
| 1.4 U , | | veloped viruses enter into host cells by |
| | (a) | endocytosis only |
| | (b) | endocytosis and phagocytosis |
| | (c) | endocytosis and membrane fusion |
| | (d) | phagocytosis only |

| 121. | The | bones of domestic animals are derived from embryonic | |
|------|-----|---|----------|
| | (a) | endoderm | |
| | (p) | mesoderm | |
| | (c) | ectoderm | |
| | (d) | epiderm | |
| 122. | The | fluoroquinolones inhibit the bacterial growth by | |
| | (a) | targeting protein synthesis | |
| | (b) | targeting DNA synthesis | |
| | (c) | altering membrane integrity | |
| | (d) | inhibiting cell-wall synthesis | |
| 123. | The | enzymes increase the rate of reaction by | |
| | (a) | decreasing the energy required to form transition state | |
| | (b) | increasing the kinetic energy of substrate | |
| | (c) | increasing the turnover number | |
| | (d) | increasing the free energy difference between substrate and product | |
| 124. | Cyt | otoxic T cells express | |
| | (a) | CD8 marker and are class-II MHC restricted | |
| | (p) | CD4 marker and are class-I MHC restricted | |
| | (c) | CD4 marker and are class-II MHC restricted | |
| | (d) | CD8 marker and are class-I MHC restricted | |
| 125. | Pre | ganglionic neurons of sympathetic nervous system secrete | |
| | (a) | epinephrine | |
| | (b) | dopamine | |
| | (c) | acetylcholine | |
| | (d) | glycine | |
| /110 | . A | 27 | [P.T.O. |

| 126. Which statement is incorrect about evolution process. | 126. | Which st | atement is | incorrect | about | evolution | process |
|--|------|----------|------------|-----------|-------|-----------|---------|
|--|------|----------|------------|-----------|-------|-----------|---------|

- (a) Evolution is a product of natural selection
- (b) Evolution need not always lead to a better phenotype
- (c) Prokaryotes evolve faster than eukaryotes
- (d) Evolution is goal-oriented

127. Which of the following techniques is named after a name of researcher?

- (a) Eastern blotting
- (b) Western blotting
- (c) Northern blotting
- (d) Southern blotting

128. Anaphylaxis and transplant rejection belong to which class of hypersensitivity?

- (a) Type-I and type-IV respectively
- (b) Type-II and type-IV respectively
- (c) Type-I and type-III respectively
- (d) Type-IV and type-II respectively

129. Choose the option with correct relationship.

- (a) Dipylidium caninum—Horseshoe-shaped ovary
- (b) Monezia—Cooked rice grain appearance of gravid segments
- (c) Stilesia hepatica—Bunch of grape like ovary
- (d) Echinococcus granulosus—Dumbbell-shaped uterus

130. Choose the option with incorrect relationship.

- (a) Pimply gut—Oesophagostomium
- (b) Hump sore—Stephanofilaria zaheeri
- (c) Increased body temperature—Milk fever condition
- (d) Rat-tailed appearance—Oxyuris equi

| 131. | Punched out ulcers in abomasum during post-mortem examination is a pathognomonic lesion of | | | |
|------|--|--|--|--|
| | (a) | theleriosis | | |
| | (b) | babesiosis | | |
| | (c) | trypanosomiasis | | |
| | (d) | anaplasmosis | | |
| 132. | Rus | ussel bodies are seen in | | |
| | (a) | RBCs | | |
| | (b) | neutrophils | | |
| | (c) | eosinophils | | |
| | (d) | plasma cells | | |
| | | | | |
| 133. | Blac | ek tongue condition occurs in | | |
| | (a) | viral infection | | |
| | (b) | bacterial infection | | |
| | (c) | vitamin deficiency | | |
| | (d) | mineral deficiency | | |
| 134. | Bico | ornuate uterus is present in | | |
| | (a) | cow | | |
| | (b) | ewe | | |
| | (c) | mare | | |
| | (d) | sow | | |
| | _ | | | |
| 135. | | n like pattern of cervical mucus is due to high content of | | |
| | (a) | chloride | | |
| | (p) | sulphate | | |
| | (c) | potassium | | |
| | (d) | sodium | | |

| 136. | Hormone responsible for growth of mammary gland duct system is | | |
|------|--|--|--|
| | (a) | prolactin | |
| | (b) | oxytocin | |
| | (c) | progesterone | |
| | (d) | estrogen | |
| 137. | The | receptors for steroid hormones are present in | |
| | (a) | cell membrane | |
| | (p) | cytoplasm | |
| | (c) | nucleus | |
| | (d) | chromosome | |
| 138. | The | kidney-shaped ovary and cauliflower-shaped corpus luteum is present in | |
| | (a) | cow | |
| | (b) | sow | |
| | (c) | bitch | |
| | (d) | mare | |
| 139. | Sun | nmer mastitis is caused by | |
| | (a) | Staphylococcus sp. | |
| | (b) | Streptococcus sp. | |
| | (c) | Corynebacterium sp. | |
| | (d) | Escherichia coli | |
| 140. | Won | nan's curling hair type of growth is a characteristic of . | |
| | (a) | Bacillus anthracis | |
| | (b) | Clostridium tetani | |
| | (c) | Staphylococcus aureus | |
| | (d) | Streptococcus pneumoniae | |

| 141. | Dimercaprol or British Anti-Lewisite (BAL) is used in acute poisoning of heavy metals, except | | |
|------|---|---|--|
| | (a) | lead | |
| | (b) | cadmium | |
| | (c) | arsenic | |
| | (d) | mercury | |
| 142. | The | intermuscular and intramuscular fat of meat is called | |
| | (a) | marbling and seam | |
| | (b) | seam and marbling | |
| | (c) | panniculus and steatosis | |
| | (d) | steatosis and panniculus | |
| 140 | m. | | |
| 143. | | pH range of very good quality meat is | |
| | (a) | 4·3 to 4·7 | |
| | (b) | 5·3 to 5·7 | |
| | (c) | 6·3 to 6·7 | |
| | (d) | 7·3 to 7·7 | |
| 144. | АТР | is required by muscles to | |
| | (a) | contract | |
| | (p) | relax | |
| | (c) | contract as well as relax | |
| | (d) | show striated appearance | |
| 145. | The | term 'mountain oysters' is related to cooked | |
| | (a) | testicles | |
| | (b) | kidney | |
| | (c) | lymph node | |
| | (d) | spleen | |
| | (4) | · | |

| | 146. | Trich | nomonas fetus causes abortion in |
|---|------|-------|--|
| | | (a) | first trimester |
| | | (p) | middle trimester |
| | | (c) | last trimester |
| | | (d) | last week |
| | 147. | | ording to the Preservation of Food Adulteration Act (PFA), 1976, cow milk should tain minimum of |
| | | (a) | 9.5 percent SNF and 6% milk fat |
| | | (b) | 8.5 percent SNF and 2.5% milk fat |
| | | (c) | 9.5 percent SNF and 3% milk fat |
| | | (d) | 8.5 percent SNF and 3.5% milk fat |
| | 148. | The | pH of a very good silage ranges between |
| | | (a) | 3·7 and 4·2 |
| | | (b) | 4·7 and 5·2 |
| | | (c) | 5·7 and 6·2 |
| | | (d) | 5·2 and 5·7 |
| | 149. | Blin | nd staggers occur due to poisoning of |
| , | | (a) | zinc |
| | | (p) | manganese |
| | | (c) | lead |
| | | (d) | selenium |
| | 150. | Frac | ction of all alleles at a particular locus in a population is called |
| | | (a) | heritability |
| | | (b) | variation |
| | | (c) | gene frequency |
| | | (d) | regression |
| | | | |

| 151. | WIN | of the following relationships between disease and drug of choice is correct? |
|------|--------------|---|
| | (a) | Trypanosomiasis—Buparvaquone |
| | (b) | Babesiosis—Suramin |
| | (c) | Theileriosis—Diminazineaceturate |
| | (d) | Anaplasmosis—Oxytetracycline |
| | | |
| 152. | Drug | g of choice for treatment of organophosphorous poisoning is |
| | (a) | carbachol |
| | (p) | neostigmine |
| | (c) | atropine |
| | (d) | All can be used |
| | | |
| 153. | Dur | ing which stage of prophase-1 crossing-over takes place? |
| | (a) | Pachytene |
| | (p) | Leptotene |
| | (c) | Zygotene |
| | (d) | Diplotene |
| | | |
| 154. | The | reagent required to test the milk for presence of detergent is |
| | (a) | bromothymol blue |
| | (b) | acetic acid solution |
| | (c) | ether |
| | (d) | hydrochloric acid |
| | | |
| 155. | The | specific antidote of nitrate toxicity in cattle is |
| | (a) | sodium thiosulphate |
| | (b) | desferrioxamine |
| | (c) | calcium disodium EDTA |
| | (d) | methylene blue |
| | | |

| 156. | The | antibody involved in immune response against naive antigen is |
|-------|------|---|
| | (a) | IgM |
| | (b) | IgG |
| | (c) | IgE |
| | (d) | IgD |
| 157. | Foot | t and mouth disease is caused by |
| | (a) | single-stranded DNA virus |
| | (b) | double-stranded DNA virus |
| | (c) | negative sense single-stranded RNA virus |
| | (d) | positive sense single-stranded RNA virus |
| 158. | The | correct statement about meiosis is |
| | (a) | chromosomes separate in meiosis-I and chromatids separate in meiosis-II |
| | (b) | chromosomes separate in meiosis-II and chromatids separate in meiosis-I |
| | (c) | chromosomes separate in both meiosis-I and -II |
| | (d) | chromatid separate in both meiosis-I and -II |
| 159. | Imn | nunologically privileged sites are |
| | (a) | thymus, eyes and Peyer's patches |
| | (b) | testicles, eyes and lymphnode |
| | (c) | testicles, eyes and brain |
| | (d) | anterior eye chamber, thymus and bone marrow |
| 160. | Vac | cination against bluetongue virus is most essential in |
| | (a) | cattle |
| | (b) | sheep |
| | (c) | goat |
| | (d) | swine |
