Question Label : Comprehension

Read the following passage and answer the questions given:

Our times seem poised to witness the resurgence of the romantic vision of human life, a view that underlines the importance of the spiritual by conceiving of life as a quest. In such a view, there are many obstacles and difficulties along the way, but if the seeker persists, then he or she will be rewarded by the union with a higher power or the spirit. In contrast the rationalist vision is sceptical of all higher powers and exalted aims of life and likes to show that all gods have clay feet. The romantic vision also emphasizes an intimate connection between human kind and universe, between self and not-self while the rationalist insists on an enduring separation between the two. He looks down at the romantic view as a scientifically wrong and philosophically confused reaction to the objective rift between mind and nature. For the rationalist, the romantic is engaged in a futile and regressive revolt against the 'bad news' of the Enlightenment: Separateness.

As a broader intellectual and social current, the romantic resurgence is more characteristic of Western societies than of most non-western ones where the romantic vision never lost its ascendancy over the rational. Or, to put it more accurately, the *Ur*-romantic vision of non-western societies generally remained oblivious of separateness and this differs from the Western post-enlightenment romantic sensibility which has been struggling to overcome the rift even as it has remained exquisitely aware of it.

Sub questions

Question Number : 19 Question Id : 6232175631 Question Type : MCQ Option Shuffling : Yes Display Question Number : Yes
