Position Your Professional Branding

Big Future Awaits You

Learning

Learning an approach is the only way to grow - best of the domain learning gets obsolete. Learn domain knowledge, tools & techniques, multiple perspectives to issues. Learning to benchmarks & competitive standards puts you ahead. Be a high quality professional!

Career

Career is built – its meaning differs in different professions. Being on the top of a profession is a common theme. A priest / saint wants to profess a large group of followers. A film star wants to be a super star. An entrepreneur wants a few billion-dollar enterprise. A social worker wants to be recognized. A professional manager wants to be a VP/Director or a CEO. Only some get there, all have a good life though. Learning the art of career building is highly uncommon. Only some develop it - Do you want to learn?

Expressing Emotions

Our lives generate a variety of small little emotional responses every day, we learn or develop assumptions that hold us back or judge others negatively. Despite challenges around – Learning to experience and express emotions puts you ahead.

Friendship

Being seen as a friendly person puts you ahead. It's not about making a friend or being a friend - Friendly feelings and attitude encourages others to keep you in their network. Want to be friendly & lively people, and yet don't step forward to say hello or express appreciation or liking for all small little things. Beliefs about the ability to be friendly & Being friendly are different.

Glamour

Being attractive, elegant, and someone who comes across as special & desirable - takes you ahead. Merit of Self-Presentation, though, gives you an edge in competitive professional life, much less valued by most. Learn to create an aura around.

An Inspirational Story

I wouldn't say it was a long journey as I still have a long journey ahead. But whatever I have achieved till now, **when I look back it looks like a dream come true for me.**

A small town girl, from a very weak financial background (father, a shoemaker) and an extremely conservative society, where girls were not allowed to pursue higher education and who was just about to get married, landed up pursuing higher education that too in a distant place.

It all looks like a coincidence - the way I met ISB&M team member (Manju Mam) in an education fair in Ludhiana, where not only ISB&M assured me about help with the education loan but also gave me the much needed confidence at that level.

Though a topper in school but that didn't convince bank to give me education loan without collateral or any guarantee as expected, loan sanctioning didn't happen because of weak financial background of my father and lack of any collateral.

In such a difficult time Dr. Pramod Kumar, not only allowed me to continue my studies without depositing my fees but also allowed me an interest free scholarship cum loan, which I repaid in installments post joining my job responsibility at Edelweiss from campus placement.

The two years at ISB&M not only molded me into a better professional but into a strong and better human being as well.

Today I am not only working as **senior vice president-Risk & Credit**, with **J M Finance** but also part of trust named "**Being Jeengar**" Which is working towards guiding and helping financially weak students.

Technology has come to define every aspect of lives of individuals, societies and nation-states.

Operating smart phones, managing our social media accounts to building and operating large & complex systems such as aircrafts, nuclear reactors and submarines- all entail learning and learning updates.

There was a time when students use to graduate out of colleges and universities, used to a take a job and there was no looking back. Like Waterfall model, life was defined by discrete events and stages-taking admission, passing out, taking job, retiring and so on. But, it's no longer the case. Technology changes every few months. You will have to learn new ways of doing things and update your knowledge continuously without respite. There is no full stop to learning.

So, learn, unlearn and relearn!

Wish you all the best!
