iii. Read the given passage and answer the questions: (4)

Maharashtra is the largest producer of tur dal, the principle source of protein in a vegetarian diet in India. The state produces nearly 28% of National output with Latur and Hingoli districts in Marathwada and Akola district in Vidarbha producing the lion's share.

In 2019-20 production of tur dal in Maharashtra was 37.36 lakh tonne and in 2020-21 it has been increased to 42.24 lakh tonne. But in the current year 2021-22, due to unfavourable climatic conditions, production of tur dal will reduce by 20% to 25% as a result of which the prices of tur dal has increased.

Last season, the state government has purchased tur at minimum base price. As the production was not predictable, the government was in trouble while buying tur under guaranteed price. Due to limited number of godowns the government has now decided to sell tur in form of dal to minimize the increasing loss due to storage, maintenance problems, etc.
