Read the following passage and answer the questions based on it.

Many great inventions are initially greeted with ridicule and disbelief. The invention of the airplane was no exception. Although many people who heard about the first powered flight on December 17, 1903 were excited and impressed, others reacted with peals of laughter. The idea of flying an aircraft was repulsive to some people. Such people called Wilbur and Orville Wright, the inventors of the first flying machine, impulsive fools.

Negative reactions, however, did not stop the Wrights. Impelled by their desire to succeed, they continued their experiments in aviation.

Orville and Wilbur Wright had always had a compelling interest in aeronautics and mechanics. As young boys they earned money by making and selling kites and mechanical toys. Later, they designed a newspaper-folding machine, built a printing press, and operated a bicycle-repair shop. In 1896, when they read about the death of Otto Lilienthal, the brothers' interest in flight grew into a compulsion.

Lilienthal, a pioneer in hang-gliding, had controlled his gliders by shifting his body in the desired direction. This idea was repellent to the Wright brothers, however, and they searched for more efficient methods to control the balance of airborne vehicles. In 1900 and 1901, the Wrights tested numerous gliders and developed control techniques. The brothers' inability to obtain enough lift power for the gliders almost led them to abandon their efforts.

Two solutions with equal Osmotic pressure are called

و مساوی ولوجی دباؤ رکھنے والے دو محلول کہلاتے ہیں

Options :

Isotonic solutions

1. ✓ آئسوٹونک محلول

Hypertonic solutions

2. ✗ ہائپرٹونک محلول

Hypotonic solutions

ہائپوٹونک محلول

3. ✖

Normal solutions

نارمل محلول

The Nernst equation $E = E^0 - \frac{RT}{nF} \ln Q$ indicates that the equilibrium constant K_c will be equal to

Q when

نیرنست مساوات $E = E^0 - \frac{RT}{nF} \ln Q$ توازنی مستقلہ K_c کو ظاہر کرتی ہے جو Q کے مساوی ہوتی ہے۔

Options :

1. ✖ $E = E^0$

2. ✖ $E^0 = 1$

3. ✔ $E = 0$

4. ✖ $\frac{RT}{nF} = 1$
