| Question Type: | MCQ |
| Question: | Melanoderms are. |

| | |
|----|-------------------------|
| A: | Yellow - skinned people |
| B: | Black - skinned people |
| C: | White - skinned people |
| D: | Green - skinned people |

| | |
|----------------|---|
| Section: | ANTHROPOLOGY |
| Item No: | 5 |
| Question ID: | 565325 |
| Question Type: | MCQ |
| Question: | The Negroids and the Mongoloids generally show: |
| A: | Dark brown iris |
| B: | Blue iris |
| C: | Green brown iris |
| D: | Blue brown iris |

| | |
|----------------|---|
| Section: | ANTHROPOLOGY |
| Item No: | 6 |
| Question ID: | 565326 |
| Question Type: | MCQ |
| Question: | If the red blood corpuscles of a person do not agglutinate in sera A or B, the person belongs to which group? |
| A: | A |
| B: | B |
| C: | AB |
| D: | O |

| | |
|----------------|---|
| Section: | ANTHROPOLOGY |
| Item No: | 7 |
| Question ID: | 565327 |
| Question Type: | MCQ |
| Question: | Race is "a population which differs in the frequency of some gene or genes, which is actually exchanging or capable of exchanging genes across whatever boundaries separate it from other population of the species." The definition was given by: |
| A: | J.B.S Haldane |
| B: | E.A Hooton |
| C: | Juan Comes |
| D: | Montagu |

| | |
|----------------|---|
| Section: | ANTHROPOLOGY |
| Item No: | 8 |
| Question ID: | 565328 |
| Question Type: | MCQ |
| Question: | Choose three right statements from the given below: |

| | |
|-----------|---|
| Question: | <p>A. Chromosome are thread shaped B. Chromosome consists of DNA C. Chromosome consists of proteins D. Chromosome consists of mitochondria E. Chromosome consists of chloroplast</p> <p>Choose the correct answer from the options given below:</p> |
| A: | A, C, D |
| B: | B, C, E |
| C: | C, D, E |
| D: | A, B, C |

| | |
|----------------|---|
| Section: | ANTHROPOLOGY |
| Item No: | 9 |
| Question ID: | 565329 |
| Question Type: | MCQ |
| Question: | <p>Read the following statements and choose the correct options.</p> <p>A. The Hottentot are formed as Khoi Khoi B. The Hottentot are found in Andaman. C. The Hottentot are formed in South-West Africa D. The Hottentot are known as Khuai E. The Hottentot are slightly taller than the Bushmen</p> <p>Choose the correct answer from the options given below:</p> |
| A: | A, B and C |
| B: | A, C and E |
| C: | C, D and E |
| D: | B, D and E |

| | |
|----------------|---|
| Section: | ANTHROPOLOGY |
| Item No: | 10 |
| Question ID: | 5653210 |
| Question Type: | MCQ |
| Question: | Gregor Mendel, conducted experiments and proposed the laws of inheritance for |
| A: | Non living organism |
| B: | Living organism |
| C: | Water bodies |
| D: | Yellow coloured pods |

| | |
|----------------|---|
| Section: | ANTHROPOLOGY |
| Item No: | 11 |
| Question ID: | 5653211 |
| Question Type: | MCQ |
| Question: | The word _____ is a term used in prehistory to denote and include all those material items which were prepared and utilized by the primitive people in their day to day activities. |
| A: | Civilization |
| B: | Culture |

| | |
|----|----------|
| C: | Arifacts |
| D: | Flint |

| | |

| Passage: | <p>The term 'Greenhouse effect' has been derived from a phenomenon that occurs in a greenhouse which looks like a small glass house and is used for growing plants especially during winter. In a greenhouse the glass panel lets the light in, but does not allow heat to escape. Therefore, the greenhouse warms up.</p> <p>The greenhouse effect is a naturally occurring phenomenon that is responsible for heating of Earth's surface and atmosphere. Without greenhouse effect the average temperature of surface of Earth would have been a chilly -18°C rather than the present average of 15°C. It is necessary to know the fate of the energy of sunlight that reaches the outermost atmosphere. Clouds and gases reflect about one fourth for of the incoming solar radiation, and absorb some of it out almost half of incoming solar radiation falls on Earth's surface heating it, while a small proportion is reflected back. Earth's surface re-emits heat in the form of infrared radiation but part of this does not escape into space as atmosphere gases (e.g. carbon dioxide, methane, etc) absorb a major fraction of it. The molecules of these gases radiate heat energy, and a major part of which again comes to Earth's surface thus heating it up once again this cycle is repeated many a times. The above mentioned gases are known as greenhouse gases because they are responsible for the greenhouse effect.</p> |
| Question: | Greenhouse effect causes. |
| A: | Global warming and climate change |
| B: | Breaking of glass panels |
| C: | Cooling of earth's surface |
| D: | Cooling of Greenhouses |

| | The term 'Greenhouse effect' has been derived from a phenomenon that occurs in a greenhouse |

The term 'Greenhouse effect' has been derived from a phenomenon that occurs in a greenhouse which looks like a small glass house and is used for growing plants especially during winter. In a greenhouse the glass panel lets the light in, but does not allow heat to escape. Therefore, the greenhouse warms up.

The greenhouse effect is a naturally occurring phenomenon that is responsible for heating of Earth's surface and atmosphere. Without greenhouse effect the average temperature of surface of Earth would have been a chilly -18°C rather than the present average of 15°C . It is necessary to know the fate of the energy of sunlight that reaches the outermost atmosphere. Clouds and gases reflect about one fourth for of the incoming solar radiation, and absorb some of it out almost half of incoming solar radiation falls on Earth's surface heating it, while a small proportion is reflected back. Earth's surface re-emits heat in the form of infrared radiation but part of this does not escape into space as atmosphere gases (e.g. carbon dioxide, methane, etc) absorb a major fraction of it. The molecules of these gases radiate heat energy, and a major part of which again comes to Earth's surface thus heating it up once again this cycle is repeated many a times. The above mentioned gases are known as greenhouse gases because they are responsible for the greenhouse effect.

| Question Type: | MCQ |
| Passage: | <p>The term 'Greenhouse effect' has been derived from a phenomenon that occurs in a greenhouse which looks like a small glass house and is used for growing plants especially during winter. In a greenhouse the glass panel lets the light in, but does not allow heat to escape. Therefore, the greenhouse warms up.</p> <p>The greenhouse effect is a naturally occurring phenomenon that is responsible for heating of Earth's surface and atmosphere. Without greenhouse effect the average temperature of surface of Earth would have been a chilly -18°C rather than the present average of 15°C. It is necessary to know the fate of the energy of sunlight that reaches the outermost atmosphere. Clouds and gases reflect about one fourth for of the incoming solar radiation, and absorb some of it out almost half of incoming solar radiation falls on Earth's surface heating it, while a small proportion is reflected back. Earth's surface re-emits heat in the form of infrared radiation but part of this does not escape into space as atmosphere gases (e.g. carbon dioxide, methane, etc) absorb a major fraction of it. The molecules of these gases radiate heat energy, and a major part of which again comes to Earth's surface thus heating it up once again this cycle is repeated many a times. The above mentioned gases are known as greenhouse gases because they are responsible for the greenhouse effect.</p> |
| Question: | <p>Which of the following is/are 'not true' in case of greenhouses?</p> <p>A. In a greenhouse, glass panels are broken to allow sunlight B. Greenhouses warm up due to a number of window in them C. Greenhouses are used for growing plants D. Greenhouses are used in winter to store rainwater E. Greenhouses give rise to greenhouse effect</p> <p>Choose the correct answer from the option given below:</p> |
| A: | A, B and C only |
| B: | A, B and D only |
| C: | C, D and E only |
| D: | B, C and D only |

| Question: | <p>Arrange the following events in chronological order.</p> <p>A. Half of the sector radiation falls on earths surface B. Solar radiations come from sun C. Clouds and gases reflect $1/4^{\text{th}}$ of the solar radiations D. Earth surface starts heating up due to greenhouse effect E. Global warming is cause</p> <p>Choose the correct answer from the option given below:</p> |
| A: | E, A, C, B, D |
| B: | D, C, B, E, D |
| C: | B, C, A, D, E |
| D: | A, D, E, C, B |

| Question Type: | MCQ |
| Passage: | <p>A Garo village is composed of several households. Traditional Garo houses are built on hill areas which have provision of water sources near by. The houses are narrow, double roofed rectangular structure, constructed on piles of or raised platforms. A Garo house has a common courtyard and the entrance to the house in from there. The open space in front of the house us used for hushing grains. Below the platform is a room called as Notzia, which is used for keeping household goods like fuel, wood, cattle, mortar pesite, etc. Above the platform, there is a central room called as dongrama and is used as a public room of the family. An area near the door in this room is called as the maljri and is used for religious purpose.</p> |
| Question: | The public room of the family in Garo houses is called as:- |
| A: | Maljri |
| B: | Notra |
| C: | Ongal |
| D: | Dongrama |
