Read the passage carefully and answer the question that follows:

The island of Bombay was acquired by the East India Company from the British government in 1668 and was immediately fortified. In Bombay the English found a large and easy-to-defend port. For that reason, and because English trade was threatened at the time by the rising Maratha power, Bombay soon superseded Surat as the headquarters of the Company on the west coast.

In Eastern India, the English Company had opened its first stat factories in Orissa in 1633. In 1651 it was given permission to trade at Hugli in Bengal. It soon opened factories at Patna in Bihar, Balasore in Orissa and Dhaka and other places in Bengal. It now desired that in Bengal too it should have an independent settlement. It dreamt of establishing political power in India which would enable it to compel the Mughals to allow them a free hand in trade, to force Indians to sell cheap, and buy dear, to keep the rival European traders out and to make its trade independent of the policies for it to appropriate Indian revenues and thus to conquer the country with its own resources. Such plans were explicitly put forward at the time. In 1687, the directors advised the governor of Madras to:

...establish such a policy of civil and military power and create and secure such a large revenue to maintain both as may be the foundation of a large, well-grounded, secure English dominion in India for all time to come.

In 1689 they declared:

The increase of our revenue is the subject of our care, as much as our trade: 'tis that must maintain our force, when twenty accidents may interrupt our trade; 'tis that must make us a nation in India...
