Rabindranath Thakur was born in Calcutta on May 07, 1861. His father Devendranath Thakur was a well known social and religious leader.

In school, Rabindranath found the teaching too elementary. It did not take his teacher long to recognise his high intelligence. He was given 'Macbeth' to translate and to everyone's surprise Rabindranath made a very good translation into Bengali. However his limitless curiosity to know more and newer things could not be satisfied in school. It was therefore, decided to withdraw him from there. For four years, from the age of thirteen to seventeen, he studied a wide variety of subjects at home. About the same time he was drawn to nature and arts.

From 1881 onwards his talent as a writer expressed itself in the form of countless compositions in poetry, drama, music, fiction, philosophy and painting. He wrote nearly 50 plays, 100 books of verse and 40 volumes of fiction and philosophical writings.

In 1901, he founded a school at Shantiniketan near Bolpur in Bengal. In 1922 it was changed into an international university called Vishvabharti.

The work which brought him universal recognition was a collection of poems named 'Gitanjali'. This won him Nobel Prize in literature in 1913 and made him internationally famous.
