(A)	HUUFNUSPOPH
(B)	FIICLIQMEMF
(C)	FUUCLUQMOMF
(D)	HEEDATTACRH

<p>Q.21</p>	<p>The stranger is by nature no "owner of soil" -- soil not only in the physical, but also in the figurative sense of a life-substance, which is fixed, if not in a point in space, at least in an ideal point of the social environment. Although in more intimate relations, he may develop all kinds of charm and significance, as long as he is considered a stranger in the eyes of the other, he is not an "owner of soil." Restriction to intermediary trade, and often (as though sublimated from it) to pure finance, gives him the specific character of mobility. If mobility takes place within a closed group, it embodies that synthesis of nearness and distance which constitutes the formal position of the stranger. For, the fundamentally mobile person comes in contact, at one time or another, with every individual, but is not organically connected, through established ties of kinship, locality, and occupation, with any single one.</p> <p>What assumptions can be made about the stranger from the passage above?</p>
<p>(A)</p>	<p>The stranger can become an owner of soil through developing all kinds of charm in more intimate relations.</p>
<p>(B)</p>	<p>The stranger cannot become an owner of soil either in the physical or psychological sense.</p>
<p>(C)</p>	<p>The stranger can become an owner of soil through establishing ties of kinship and so on.</p>
<p>(D)</p>	<p>The stranger might become an owner of soil in the physical sense but not in the psychological</p>

(A)	Grandchild and Paternal Grandfather
(B)	Grandchild and Maternal Grandfather
(C)	Grandchild and Paternal Grandmother
(D)	Grandchild and Maternal Grandmother

<p>Q.23</p>	<p>Five segments of a sentence are given below. The first and fifth segments are at their correct positions, while the middle three segments (represented by 2, 3, and 4) are jumbled up. Choose the correct order of the segments so that they form a coherent sentence:</p> <ol style="list-style-type: none"> 1. Consumed multitudes are jostling and shoving inside me 2. and guided only by the memory of a large white bedsheet with a roughly circular hole some seven inches in diameter cut into the center, 3. clutching at the dream of that holey, mutilated square of linen, which is my talisman, my open-sesame, 4. I must commence the business of remaking my life from the point at which it really began, 5. some thirty-two years before anything as obvious, as present, as my clock-ridden, crime-stained birth.
<p>(A)</p>	<p>2 – 3 – 4</p>
<p>(B)</p>	<p>3 – 2 – 4</p>
<p>(C)</p>	<p>4 – 2 – 3</p>
<p>(D)</p>	<p>4 – 3 – 2</p>

Q.24	<p>“I told you the truth,” I say yet again, “Memory’s truth, because memory has its own special kind. It selects, eliminates, alters, exaggerates, minimizes, glorifies, and vilifies also; but in the end it creates its own reality, its heterogeneous but usually coherent versions of events; and no sane human being ever trusts someone else’s version more than his own.”</p> <p>What are the different ways in which ‘truth’ can be understood from the passage?</p>
(A)	Truth is what can be verified by hard empirical evidence.
(B)	Truth is based on what can be perceived by the senses.
(C)	Truth is the product of memory that is fallible, selective and slanted.
(D)	Truth is contingent on the observer and can only be partial.

(A)	q
(B)	r
(C)	s
(D)	$\sim p$
Q.62	<p>$\sim q$ can be deduced from $\sim(p \supset (q \vee r))$ by using rules of propositional logic in the following sequence[s]:</p>
(A)	Material Implication> De Morgan's Theorem> Commutation> Simplification> De Morgan's Theorem> Simplification
(B)	Conjunction> Addition> Modus Ponens> De Morgan's Theorem
(C)	Transposition> Material Implication> Double Negation> De Morgan's Theorem> Simplification> De Morgan's Theorem> Simplification
(D)	Modus Tollens> Conjunction> Hypothetical Syllogism> Simplification

<p>Q.63</p>	<p>Read the passage below from Wittgenstein’s <i>Philosophical Investigations</i> carefully and answer the question.</p> <p>I can think of no better expression to characterize these similarities than “family resemblances”; for the various resemblances between members of a family – build, features, colour of eyes, gait, temperament, and so on and so forth – overlap and crisscross in the same way. – And I shall say: ‘games’ form a family.</p> <p>And likewise the kinds of number, for example, form a family. Why do we call something a “number”? Well, perhaps because it has a – direct – affinity with several things that have hitherto been called “number”; and this can be said to give it an indirect affinity with other things that we also call “numbers.” And we extend our concept of number, as in spinning a thread we twist fibre on fibre. And the strength of the thread resides not in the fact that some one fibre runs through its whole length but in the overlapping of many fibres.</p> <p>But if someone wanted to say, “So there is something common to all these constructions – namely, the disjunction of all their common properties” – I’d reply: Now you are only playing with a word. One might as well say, “There is a Something that runs through the whole thread – namely, the continuous overlapping of these “fibres.”</p> <p style="text-align: right;">- Ludwig Wittgenstein, <i>Philosophical Investigations</i>, Investigation No. 67</p> <p>Which of the following statement[s] does Wittgenstein imply in the above passage?</p>
(A)	The one fibre supposed to run through the length of the thread corresponds to what is supposed to be common to all numbers
(B)	The overlapping of the fibres corresponds to the family resemblance Wittgenstein is trying to explicate
(C)	It is absurd to insist that there is one thing common to all the members of the family
(D)	To describe a family resemblance is another way to describe the common property shared by all the family members

Q.64	In Kant's <i>Critique of Pure Reason</i> , the equation $7 + 5 = 12$ is synthetic <i>a priori</i> and not simply analytic for the following reason[s].
(A)	A simple analysis of the concept of 5, the concept of 7 and the concept of addition does not give us the sum 12
(B)	With 7 as the starting point, we require an intuition such as 5 fingers or 5 marks on a page to reach upto 12
(C)	If $7 + 5 = 12$ were an analytic proposition it would not need any intuition to know it
(D)	We arrive at the knowledge of $7 + 5 = 12$ by imitating others adding 7 and 5
Q.65	According to Sartre's <i>Being and Nothingness</i> , which of following statement[s] is/are true?
(A)	Bad faith is human beings' denial of their own freedom
(B)	To assert the existence of nothingness is to deny the existence of human freedom
(C)	To assert the existence of nothingness is to assert the existence of human freedom
(D)	Being and nothingness self-evidently exclude each other
