

NEET MDS Model Questions 2024

Questions:

1. Penicillamine is an antidote for?
2. Plexus of raschkow present in?
3. Which drug should be administered to Acute Heart Failure patients?
4. Enamel hypoplasia affects?
5. The best method to detect incipient caries?
6. What is the most common cause of implant failure?
7. What would you use to control systemically in bleeding extraction tooth case?
8. Sunflower cataract Kayser -Fleisher occurs due to?
9. What is alginate filler derived from?
10. Health scheme for non-communicable diseases?
11. Posterior mediastinal tumour causes compression on?
12. In thalassemia hyperkalaemia due to which food?
13. Double blinding reduces which bias?
14. Health scheme for non communicable diseases:
15. Law of symmetry is not followed by:
 - Maxillary molars
 - Mandibular molars
 - Maxillary premolars
 - Mandibular premolars
16. Which of the following is used to enlarge canal opening?
 - K-file
 - Reamer
 - Gates Glidden drill
 - Path finder
17. Strength of gypsum bonded investment material is provided by:
 - Carbon
 - Copper
 - Silica
 - Gypsum
18. All of the following statements regarding self cure as compared to heat cure are true, except:
 - Self cure has lower molecular weight
 - Self cure has higher residual monomer content

- Self cure is more porous
- Self cure has more transverse strength

19. During bleaching, light emitted from LED lamp is:

- Cold blue visible light 465 nm
- Hot blue visible light 465 nm
- Cold orange visible light 465 nm
- Cold green visible light 465 nm

20. The process of making the impression material to conduct electricity is:

- Metallizing
- Electroplating
- Iontophoresis
- Galvanizing

21. As the intensity increases, hue perception changes. The effect is called:

- Metamerism
- Bezold- Brucke effect
- Chameleon effect
- Tyndall effect

22. Which of the following statements is incorrect for furcation defect?

- Grade 3 defect is clinically visible.
- Grade 1 can be visible radiographically as radiopaque.
- In Grade 4 inter-radicular bone is completely lost.
- In Grade 2 bone is attached to the dome of the furcation

23. Cheese like material composed of food particles, desquamated epithelial cells, leukocytes and microbes, which can be easily displaced with water spray is known as:

- Materia alba
- Pellicle
- Calculus
- Acquired plaque

24. Which of the following is not found in the root?

- Enamel
- Dentin
- Cementum
- Pulp

25. Serum lipase levels are increased in:

- Acute pancreatitis
- Diabetes mellitus
- Myocardial infarction
- Obstructive jaundice

26. The plaque found in heavy calculus former differs from that in non-calculus former in that it has:

- Low calcium
- Low potassium
- Low phosphorus
- Mineral content is same

27. Drug of choice in acute necrotizing ulcerative gingivitis is:

- Metronidazole
- Clindamycin
- Tetracycline
- Ceftriaxone

28. Which vitamin deficiency is seen in chronic alcoholics?

- Vit B₁₂
- Thiamine
- Riboflavin
- Vit A

29. The 18:8 stainless steel is composed of:

- 18 – Chromium, 8 – Nickel
- 18 – Cobalt, 8 – Chromium
- 18 – Cobalt, 8 – Nickel
- 18 – Nickel, 8 – Chromium

30. Titanium welding is done using:

- Argon
- Laser assisted
- Spot welding
- Thermal welding
