Data Sufficiency (దత్తాంశ పర్యాప్తత)

Note: In questions numbered 1 to 20, a question is followed by data in the form of two statements labelled as I and II. You have to decide whether the data given in the statement is sufficient to answer the questions. using the data make an appropriate choice from (1) to (4) as per the following guidelines:

- a) Mark choice (1) if the statement I alone is sufficient to answer the question
- b) Mark choice (2) if the statement II alone is sufficient to answer the question
- c) Mark choice (3) if the statements I and II together are sufficient to answer the question but neither statement alone is sufficient.
- d) Mark choice (4) if the statements I and II together are not sufficient to answer the question and additional data is required.
 గమనిక: 1 నుండి 20 వరకు ఉన్న ప్రశ్నలలో, ఒక ప్రశ్నకు I మరియు II అని లేబుల్ చేయబడిన రెండు స్టేట్

మెంట్ల రూపంలో డేటా ఉంటుంది. ప్రశ్నలకు సమాధానం ఇవ్వడానికి స్టేట్మెంట్లో ఇచ్చిన డేటా సరిపోతుందో లేదో మీరు నిర్ణయించుకోవాలి. కింది మార్గదర్శకాల ప్రకారం డేటాను ఉపయోగించి (1) నుండి (4) వరకు తగిన ఎంపిక చేసుకోండి:

- a) ప్రశ్నకు సమాధానం ఇవ్వడానికి స్టేట్మమెంట్ I మాత్రమే సరిపోతే ఎంపిక (1) ను గుర్తించండి.
- b) ప్రశ్నకు సమాధానమివ్వడానికి స్టేట్మెంట్ II మాత్రమే సరిపోతే ఎంపిక (2) ను గుర్తించండి .
- c) ప్రశ్నకు సమాధానమివ్వడానికి I మరియు II స్టేట్మమెంట్లు సరిపోతాయి కానీ ఒక్క స్టేట్మెంట్ మాత్రమే సరిపోకపోతే ఎంపిక (3) ను గుర్తించెండి.
- d) ప్రశ్నకు సమాధానం ఇవ్వడానికి I మరియు II స్టేట్మమెంట్లు సరిపోకపోతే మరియు అదనపు డేటా అవసరమైతే ఎంపిక (4) ను గుర్తించెండి.

Table or Graph పట్టిక లేదా గ్రాఫ్

In a community of 300 people, 50 members know Hindi(H), English(E) and Telugu(T), 40 members know E and H only. The number of members knowing T and H only is equal to the number of members knowing E and T only. 40 know only Telugu, 40 know only Hindi and 30 know only English. Basing this information, answer questions 61-65, assuming that every person know at least one of the three languages.

300 మంది వున్న ఒక సమాహం లో , 50 మందికి హిందీ (H), ఇంగ్లీష్ (E) మరియు తెలుగు (T) తెలుసును. 40 మందికి మాత్రమే E మరియు H తెలుసును. T మరియు H మాత్రమే తెలిసిన వారి సంఖ్య E మరియు T మాత్రమే తెలిసిన వారి సంఖ్యకు సమానము. 40 మందికి మాత్రమే తెలుగు, 40 మందికి మాత్రమే హిందీ మరియు 30 మందికి మాత్రమే ఇంగ్లీష్ తెలుసు. ఈ సమాచారాన్ని ఆదారంగా చేసుకొని 61-65 సమాధానాలివ్వండి ; ఈ సమాహంలోని ప్రతి ఒక్కరికి మూడింటిలో ఏదో ఒక భాష తెలుసునని అనుకోండి .

Read the following passage and answer the questions (126 to 130) given below

The function of education is to prepare young people to understand the whole process of life. The end of education is not merely to pass some examinations and get a job and earn one's livelihood. If education is to make people understand life, then surely life is not merely a job or an occupation – life is something extraordinarily wide and profound, a great mystery, a vast realm in which we function as human beings. If we prepare ourselves only to earn a livelihood, we shall miss the whole point of life. To understand, life is much more important than to get a degree or pass an examination for a job. Life, with all its subtleties, is such a vast expanse. It has its extraordinary beauty, its sorrows and joys. It also has its hidden things of the mind, such as envies, ambitions, passions, fears, fulfilments, and anxieties. The birds, the flowers, the flourishing trees, the heavens, the stars, the rivers, and the fishes therein all this is life. When we are young, we must seek and find out what life is all about. Thus, we cultivate intelligence with the help of education. Intelligence is the capacity to think freely, without fear and without a formula, so that we begin to discover for ourselves what is real and what is true. Anyone who is gripped with fear will never be intelligent. Most of us have fear in one form or another. Where there is fear there is not intelligence. Thus, what education should do is help us understand the need of freedom. Unless we are free, we will not understand the need of freedom. Unless we are free, we will not understand the whole process of living. When we are free we have no fear. We do not imitate, but we discover.

Question Numbers: (131 to 135)

Read the following passage and answer the Question (131 to 135) given below:

Science, by itself cannot supply us with ethic. It can show us how to achieve a given end, and it may show us that some ends cannot be achieved. But among ends that can be achieved our choice must be decided by other than purely scientific considerations. If a man were to say, "I hate the human race, and I think it would be a good thing if it were exterminated," we could say, "Well, my dear sir, let us begin the process with you". But this is hardly argument, and no amount of science could prove such a man mistaken.

But all who are not lunatics are agreed about certain things: That it is better to be alive than dead, better to be adequately fed than starved, better to be free than a slave. Many people desire those things only for themselves and their friends; they are quite content that their enemies should suffer. These people can be refuted by science: Mankind has become so much one family that we cannot insure own prosperity except by insuring that of everyone else. If you wish to be happy to yourself you must resign yourself to seeing other also happy. Whether science can continue, and whether, while it continues, it can do more good than harm, depends upon the capacity of mankind to learn the simple lesson. Sentiments, when widespread, determine the policies and decisions of nations. Science can, if rulers so desire create sentiments which will avert disaster and facilitate cooperation. At present there are powerful rulers who have such wish. But the possibility exists, and science can be just as potent for good as per evil. It is not science, however, which will determine how science is used.

LUIDSTIAN NIIIMMARS 1/176 fA 1/11)		

Read the following Passage and answer the questions given below: (136-140)

A moment later Nadia and Huda said that before we had lunch, there was somebody waiting for me in the kitchen. Would I like to see him? A small, wiry man in the dark robe and turban of a formally dressed Upper Egyptian peasant came into the room. When told by the two women that this was the Edward he had patiently been waiting to see, he drew back, shaking his head. "No, Edward was tall, and he wore glasses. This isn't Edward." I had quickly recognized Ahmad Hamed, our suragi (butler) for almost three decades, an ironic, fanatically honest and loyal man whom we had all considered a member of the family. I then tried to persuade him that it was indeed me, changed by illness and age, after thirty-eight years of absence. Suddenly we fell into each other's arms, sobbing with the tears of happy reunion and a mourned, irrecoverable time. He talked about how he had carried me on his shoulders, how we had chatted in the kitchen, how the family celebrated Christmas and New Year, and so on. I was astounded that Ahmad minutely remembered not only the seven of us—parents and five children—but also each of my aunts, uncles, and cousins, and my grandmother, in addition to a few family friends. And then, as the past poured out of him, an old man retired to the distant town of Edfu near Aswan, I knew again how fragile, precious, and fleeting were the history and circumstances not only gone forever, but basically unrecalled and unrecorded except as occasional reminiscence or intermittent conversation.

Question Numbers: (141 to 145)

Read the following Passage and answer the questions given below: (141-145)

India's business environment is a dynamic landscape shaped by a myriad of factors. With a population exceeding 1.3 billion and a burgeoning middle class, the country presents a vast market ripe with opportunities for both domestic and international enterprises. However, navigating this complex terrain requires a keen understanding of various elements, including regulatory frameworks, cultural nuances, and infrastructural challenges. India's regulatory environment, while gradually evolving to foster ease of doing business, still presents hurdles such as bureaucratic red tape and complex taxation systems. The implementation of Goods and Services Tax (GST) in 2017 aimed to streamline taxation, yet its complexities persist. Furthermore, cultural diversity across India's states adds layers of complexity, requiring businesses to adapt their strategies accordingly. Despite these challenges, India's business landscape is marked by innovation and resilience. The country has emerged as a global hub for technology and entrepreneurship, with cities like Bangalore earning the moniker of 'Silicon Valley of India'. Additionally, initiatives such as 'Make in India' and 'Digital India' seek to boost manufacturing and digital infrastructure, further fueling economic growth. However, infrastructural bottlenecks, including inadequate transportation networks and power shortages, remain significant hurdles. Moreover, the COVID-19 pandemic has underscored the importance of adaptability and digital transformation in sustaining businesses. As India continues its path of economic development, fostering a conducive business environment will be crucial in unlocking its full potential. Collaboration between the government, private sector, and civil society will be essential in addressing challenges and capitalizing on opportunities, paving the way for sustainable growth and prosperity in the Indian business landscape.
