A4:4

Objective Question

10 1910

Consider the following statements

- (A) Real power is expressed in kW
- (B) Apparent power is expressed in kV
- (C) Reactive power does not provide useful mechanical work.
- (D) A motor operating at a given load and supply voltage, draws active and reactive power.
- (E) Both Real power and Apparent power are expressed in kW

Choose the *correct* answer from the options given below:

- 1. (A), (C), (D) and (E) only.
- 2. (A) and (B) only.
- 3. (B) and (D) only.
- 4. (A), (B), (C) and (D) only.

A4:4

Objective Question

14 1914

Consider the following statements related to Mohr failure hypothesis:

4.0 1.00

- **Statement (I):** Shear stress on the failure envelope is the maximum shear stress in the element.
- **Statement (II):** The maximum shear stress acts on a plane inclined at 45⁰ to major principle plane

In light of the above statements, choose the *most appropriate* answer from the options given below.

- 1. Both **Statement** (I) and **Statement** (II) are true.
- 2. Both Statement (I) and Statement (II) are false.
- 3. Statement (I) is true but Statement (II) is false.
- 4. **Statement (I)** is false but **Statement (II)** is true.

A1:1

A2:2

A3:3

15 1915

Which of the following Law's are based on gradient:

- (A) Stefan -Boltzmann law
- (B) Fourier's law
- (C) Newton's law of cooling
- (D) Fick's law

Choose the *correct* answer from the options given below:

- 1. (A), (B) and (C) only.
- 2. (B), (C) and (D) only.
- 3. (A), (C) and (D) only.
- 4. (A), (B) and (D) only.

- (A) In levelling, datum surface is an arbitary surface with reference to which the elevations of the points are measured and compared.
- (B) The line of collimation or the line of sight is the line joining the intersection of the cross hairs to the optical centre of the object glass and its continuation.
- (C) A foresight is the first staff reading taken after setting up the instrument in any position.
- (D) The height of instrument is the elevation of the plane of collimation when the instrument is levelled.
- (E) A change point indicates the shifting of the instrument, both back sight and intermediate sight are taken on this change point.

Choose the *correct* answer from the options given below:

- 1. (A), (B) and (D) only.
- 2. (A), (B) and (C) only.
- 3. (C), (D) and (E) only.
- 4. (B), (C) and (D) only.

Objective Question

113 2013

Match List-I with List-II

4.0 1.00

	List-I		List-II
(A)	Close contour lines	(I)	foot hill
(B)	Wider contour lines	(II)	higher contour values outside
(C)	Depression	(III)	at right angles
(D)	Crossing of ridge lines	(IV)	top of hill

Choose the **correct** answer from the options given below:

- 1. (A) (IV), (B) (I), (C) (II), (D) (III)
- 2. (A) (I), (B) (II), (C) (III), (D) (IV)
- 3. (A) (II), (B) (III), (C) (I), (D) (IV)
- 4. (A) (IV), (B) (II), (C) (I), (D) (III)

114	2014	Whic	ch points should be kept in mind while selecting the stations?	4.0	1.00
		(A)	The survey lines should be as few as possible.		
		(B)	If possible, a base line should be run roughly through the middle of the area on which the framework of triangles covering the major portions of area may be built up.		
		(C)	Offsets should be long particularly for locating the important features .		
		(D)	All the triangles should be well conditioned.		
		(E)	The main principle of surveying is to work from the part to the whole.		
		Choo	ose the <i>correct</i> answer from the options given below:		
		1.	(A), (B) and (C) only.		
		2.	(B), (C) and (D) only.

Objective Qu	estion estimate the second		<u> </u>
20 2020	Given below are two statements:	4.0	1.00
	Statement (I): The axis of the bubble tube should be perpendicular to the vertical axis in dumpy level.		
	Statement (II): The line of collimation of the telescope of the dumpy level should be perpendicular to the axis of the bubble tube.		
	In light of the above statements, choose the <i>most appropriate</i> answer from the options given below.		
	1. Both Statement (I) and Statement (II) are correct.		
	2. Both Statement (I) and Statement (II) are incorrect.		
	3. Statement (I) is correct but Statement (II) is incorrect.		
	4. Statement (I) is incorrect but Statement (II) is correct.
