Which of the following has dimensions

Options:

Activity coefficient

2. Fugacity

3. Activity

4. * Fugacity coefficient

Question Number: 22 Question Id: 2839369542 Question Type: MCQ Option Shuffling: Yes

Display Question Number : Yes Is Question Mandatory : No Calculator : None Response Time

: N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks: 1 Wrong Marks: 0

For endothermic reaction, the equilibrium constant is

Options:

Decreases with increase in temperature

2. * Increases with increase in temperature

3. Decreases linearly with decrease in temperature

4. Not effected by change in temperature

Question Number: 23 Question Id: 2839369543 Question Type: MCQ Option Shuffling: Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks: 1 Wrong Marks: 0

The enthalpy change of mixing for ideal gases is

Options:

1 w one

2. x Infinity

3. V zero

4. × Five

Question Number: 24 Question Id: 2839369544 Question Type: MCQ Option Shuffling: Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

Correct Marks: 1 Wrong Marks: 0

Throttling process is

Options:

1. * reversible & constant enthalpy process

2 ✓ irreversible & constant enthalpy process

* reversible & constant entropy process

4. * reversible & isothermal process

Question Number: 26 Question Id: 2839369546 Question Type: MCQ Option Shuffling: Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time: N.A Minimum Instruction Time: 0

Correct Marks: 1 Wrong Marks: 0

For an ideal fluid flow the Reynolds number is

Options:

1. / Infinity

2. × Zero

3. M One

4. 2100

Question Number: 27 Question Id: 2839369547 Question Type: MCQ Option Shuffling: Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks: 1 Wrong Marks: 0

For a duct of square cross section of side 'a', the hydraulic radius is

Options:

 $\frac{a}{2}$

$$\frac{a}{6}$$

$$\frac{a}{4}$$

Question Number: 28 Question Id: 2839369548 Question Type: MCQ Option Shuffling: Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

Correct Marks: 1 Wrong Marks: 0

Hagen-Poiseuille equation is applicable for

Options:

- 1. Laminar flow of non-Newtonian fluids
- 2. Newtonian & Non-Newtonian fluids
- 3. Turbulent flow
- 4. Laminar flow of Newtonian fluids

Question Number: 35 Question Id: 2839369555 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time: N.A Minimum Instruction Time: 0 Correct Marks: 1 Wrong Marks: 0 Globe valve is most suitable when **Options:** The valve is required to be either fully open or fully closed 2 Flow control is required 3. * The fluid contains dispersed particles 4. * One-way flow is required Question Number: 36 Question Id: 2839369556 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time : N.A Think Time: N.A Minimum Instruction Time: 0 **Correct Marks: 1 Wrong Marks: 0** In ball mill size reduction is done by **Options:** 1. Cutting 2. Impact and attrition 3. * Attrition 4. Impact

Question Number: 37 Question Id: 2839369557 Question Type: MCQ Option Shuffling: Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time : N.A Think Time: N.A Minimum Instruction Time: 0 Correct Marks: 1 Wrong Marks: 0 In filtration operation, the filter aids are used to **Options:** decrease the porosity of cake 2 increase the porosity of cake increase the compressibility coefficient of cake decrease the compressibility coefficient of cake Question Number: 38 Question Id: 2839369558 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time : N.A Think Time: N.A Minimum Instruction Time: 0 Correct Marks: 1 Wrong Marks: 0 In Taylor standard screens, the ratio of the actual mesh dimension of any screen to that of the next smaller screen is **Options:** 1 < 1.414 2. * 1.732

3 * 2.5

4 * 1.6

Question Number: 39 Question Id: 2839369559 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time : N.A Think Time : N.A Minimum Instruction Time : 0 Correct Marks: 1 Wrong Marks: 0 Energy requirement per unit mass of material crushed is highest for **Options:** 1 Rod mill 2. Fluid energy mill 3. ball mill 4 Jaw crusher Question Number: 40 Question Id: 2839369560 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time : N.A Think Time: N.A Minimum Instruction Time: 0 Correct Marks: 1 Wrong Marks: 0 In agitation, power consumption in turbulent flow is proportional to the **Options:** density of liquid 2. * viscosity of liquid 3 interface tension of liquid

4. * thermal conductivity of liquid

Question Number: 41 Question Id: 2839369561 Question Type: MCQ Option Shuffling: Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time: N.A Minimum Instruction Time: 0

Correct Marks: 1 Wrong Marks: 0

The dimensions of specific cake resistance are

Options:

Question Number: 42 Question Id: 2839369562 Question Type: MCQ Option Shuffling: Yes

Display Question Number : Yes Is Question Mandatory : No Calculator : None Response Time

: N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks: 1 Wrong Marks: 0

The devices which separate particles of different densities are known as

- 1. x cyclones
- 2. * thickeners
- 3. Sorting clasifiers
- 4. # filters

Question Number: 43 Question Id: 2839369563 Question Type: MCQ Option Shuffling: Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time: N.A Minimum Instruction Time: 0

Correct Marks: 1 Wrong Marks: 0

When granular solids are piled up on a flat surface, the sides of the pile are at a definite reproducible angle with horizontal, then angle is

Options:

- Angle of incidence
- 2. * Angle of internal friction
- 3. Angle of nip
- 4.

 ✓ Angle of repose

Question Number : 44 Question Id : 2839369564 Question Type : MCQ Option Shuffling : Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks: 1 Wrong Marks: 0

The ratio of inertial stress to the gravitational force per unit area acting on the fluid is

- 1 Weber number
- Reynolds number
- 3. Froude Number

4. * Power number

Question Number: 45 Question Id: 2839369565 Question Type: MCQ Option Shuffling: Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

Correct Marks: 1 Wrong Marks: 0

In screen analysis, the notation 50/100 means

Options:

Passing through 50 mesh and retained on 100 mesh

- Passing through 100 mesh and retained on 50 mesh
- 3. * 50 gm fines and 100 gm coarse
- 4. 100 gm fines and 50 gm coarse

Question Number : 46 Question Id : 2839369566 Question Type : MCQ Option Shuffling : Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks: 1 Wrong Marks: 0

The critical radius of insulation of a sphere in terms of Thermal conductivity k and Heat transfer coefficient h is

$$\frac{2k}{h}$$

$$\frac{k}{2h}$$

Question Number : 47 Question Id : 2839369567 Question Type : MCQ Option Shuffling : Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time: N.A Minimum Instruction Time: 0

Correct Marks: 1 Wrong Marks: 0

The Biot number is important in solving the problems of

Options:

1. Heat transfer by radiation

2. * Heat transfer by natural convection

3. * Heat transfer by forced convection

4. Transient heat conduction

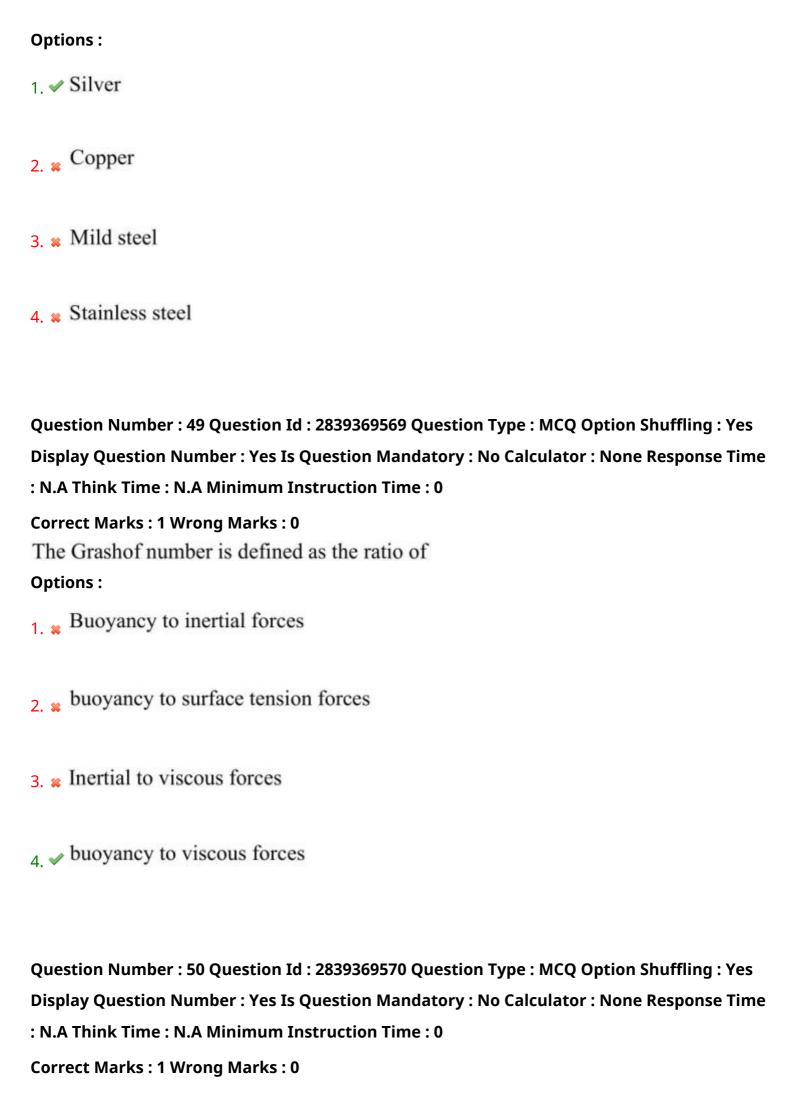

Question Number: 48 Question Id: 2839369568 Question Type: MCQ Option Shuffling: Yes

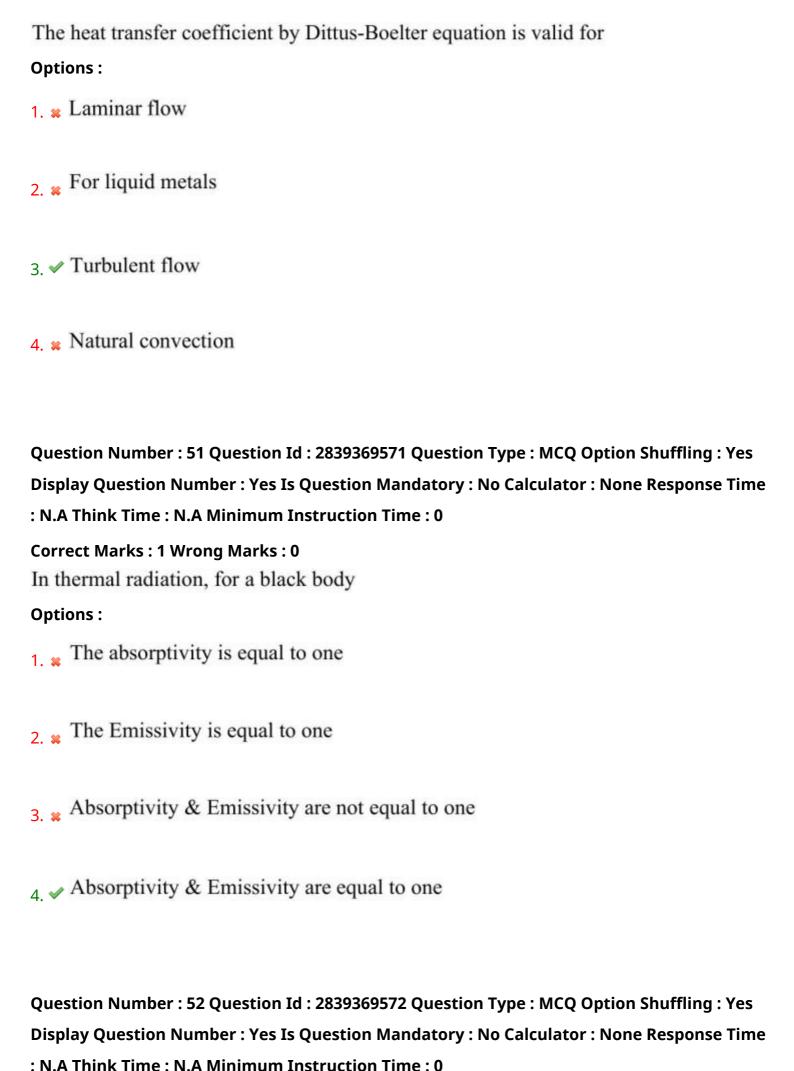

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks: 1 Wrong Marks: 0

The thermal conductivity is maximum for

Correct Marks: 1 Wrong Marks: 0 The presence of small amounts of non-condensing gas in a condensing vapour **Options:** 1. increases rate of condensation 2 Reduces rate of condensation 3. Does not affect rate of condensation Increases condensing film coefficient Question Number: 53 Question Id: 2839369573 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time : N.A Think Time: N.A Minimum Instruction Time: 0 Correct Marks: 1 Wrong Marks: 0 Heat transfer by radiation is described by **Options:** 1 Fick's law 2 Fourier's law

Question Number: 54 Question Id: 2839369574 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

3. Newton's law

4. Steffan-Boltzman's law

: N.A Think Time: N.A Minimum Instruction Time: 0 Correct Marks: 1 Wrong Marks: 0 The capacity of an evaporator is defined as **Options:** Number of kgs of solvent vaporized per hour Number of kgs of solvent vaporized per kg of steam fed to the evaporator 3. Number of kgs of steam consumed per hour Number of kgs of steam consumed per kg of solvent vaporized Question Number: 55 Question Id: 2839369575 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time : N.A Think Time: N.A Minimum Instruction Time: 0 Correct Marks: 1 Wrong Marks: 0 Duhring's rule is useful in solving problems of **Options:** 1 Distillation 2. V Evaporation 3. Crystallization 4. Drying

Question Number: 56 Question Id: 2839369576 Question Type: MCQ Option Shuffling: Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time: N.A Minimum Instruction Time: 0

Correct Marks: 1 Wrong Marks: 0

The molecular diffusivity of a liquid is

Options:

1. Increases with temperature

2. decreases with temperature

3. * increase or decrease with temperature

independent of temperature

Question Number : 57 Question Id : 2839369577 Question Type : MCQ Option Shuffling : Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time : N.A Minimum Instruction Time : 0

Correct Marks: 1 Wrong Marks: 0

Mass transfer coefficient, k, according to penetration theory varies with mass diffusivity as

1.
$$\checkmark$$
 D^{0.5}

Question Number: 58 Question Id: 2839369578 Question Type: MCQ Option Shuffling: Yes

Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time

: N.A Think Time: N.A Minimum Instruction Time: 0

Correct Marks: 1 Wrong Marks: 0

Sherwood number in mass transfer is analogous to the following dimensionless group in heat transfer

Options:

- Graetz number
- 2. * Grashof number
- 3. V Nusselt number
- 4. Prandtl number

 ${\bf Question\ Number: 59\ Question\ Id: 2839369579\ Question\ Type: MCQ\ Option\ Shuffling: Yes}$

Correct Marks: 1 Wrong Marks: 0

In distillation under minimum reflux conditions, the number of theoretical stages are

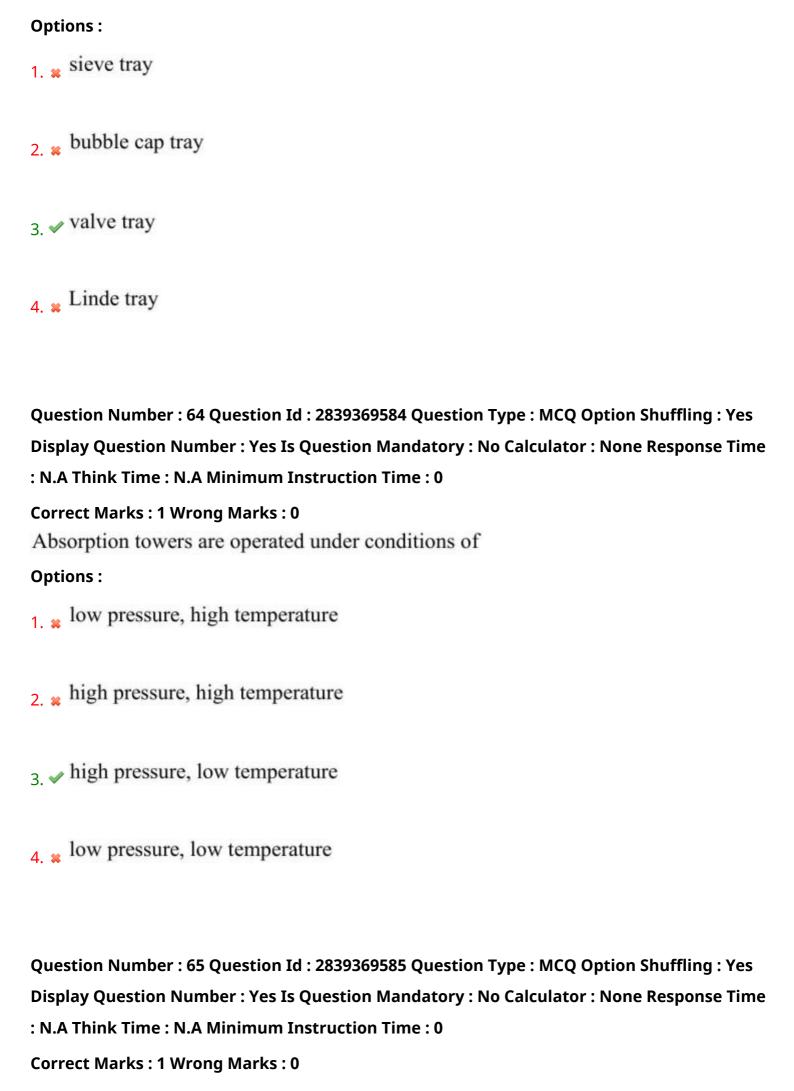

Options:

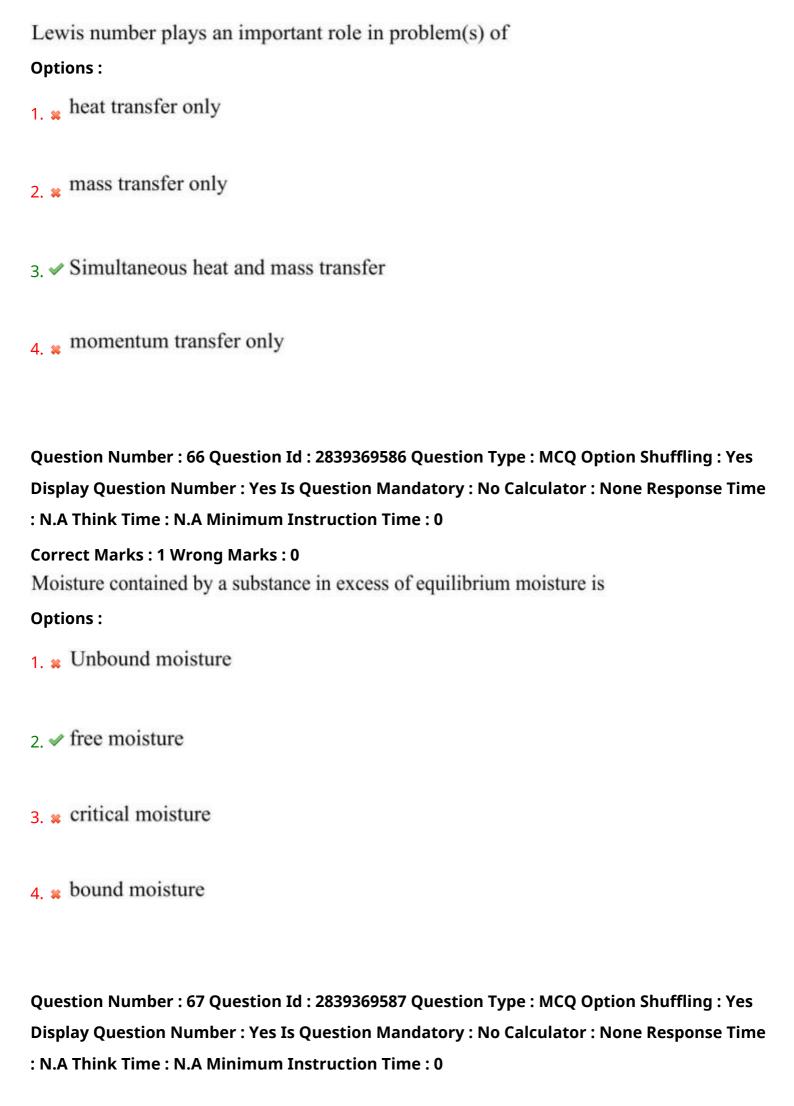

1. a one

2. x two 3. V Infinite 4. **x** five Question Number: 62 Question Id: 2839369582 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time : N.A Think Time: N.A Minimum Instruction Time: 0 Correct Marks: 1 Wrong Marks: 0 If the temperature of atmosphere increases at constant absolute humidity, the wet-bulb temperature would **Options:** 1 Decrease 2 gremain constant 3. increase 4. Decreases and then increases Question Number: 63 Question Id: 2839369583 Question Type: MCQ Option Shuffling: Yes Display Question Number: Yes Is Question Mandatory: No Calculator: None Response Time : N.A Think Time: N.A Minimum Instruction Time: 0

The type of tray which gives greatest flexibility in distillation column is

Correct Marks: 1 Wrong Marks: 0

Correct Marks: 1 Wrong Marks: 0

At a given equilibrium pressure the concentration of adsorbed gas on adsorbent solid is

Options:

- 1. remains constant with change in temperature
- 2. * increases with increased temperature
- 3. decreases with increased temperature
- 4. increases linearly with decrease temperature
