#### 1. COURSE INFORMATION

During the one-year duration of 'Horticulture' trade a candidate is trained on professional skill, professional knowledge and Employability skill related to job role. In addition to this a candidate is entrusted to undertake project work, extracurricular activities and on job training to build up confidence. The broad components covered under Professional Skill subject are as below:-

During the one-year duration the trainee learns about agro-meteorology, importance of different elements of weather & climate of agriculture, farm power and machinery, types and application of farm power, farm electricity, agricultural implements, basic knowledge on plant biology, Renewable energy, Soil properties, concept of formation of soil moisture and its conservation, role of organic matter in soil and its recycling water and their management, Soil fertility, fertilizers, manures &management of soil fertility and productivity, Introductory horticulture, fundamentals of horticultures, Importance and scope of horticulture, classification of horticultural plants etc. The trainee learns about importance of fruits, flowers and vegetables, distribution of area production and productivity of fruits, vegetables and flowers, present situation and scope of development of horticultural crops, schemes on horticultural development, layout of plots and gardens, planning for home gardens, landscape gardens, experimental designs, fruit culture, vegetable propagation, cultivation of fruits& vegetables and its preservation, management of orchards, present situation of cultivation of different fruits, Vegetative propagation, different methods of vegetative propagation of fruits and flowers. cultivation of vegetables & spices, present situation in the cultivation of different vegetable crops, cultivation of flowers, climbers, foliages & other crops, cultivation of mushroom, care and management of potted plants, pest management, classes of insect pests diseases, integrated pest management, Seed production, marketing & trade management, quality of seeds and classification of seeds, Inventory control & maintenance of records, markets and marketing, trade and trading, methods of management of store, types of market, export of products etc.

#### 2.1 GENERAL

The Directorate General of Training (DGT) under Ministry of Skill Development & Entrepreneurship offers a range of vocational training courses catering to the need of different sectors of economy/ Labour market. The vocational training programmes are delivered under the aegis of Directorate General of Training (DGT). Craftsman Training Scheme (CTS) with variants and Apprenticeship Training Scheme (ATS) are two pioneer schemes of DGT for strengthening vocational training.

'Horticulture' trade under CTS is one of the popular courses delivered nationwide through network of ITIs. The course is of one-year duration. It mainly consists of Domain area and Core area. The Domain area (Trade Theory & Practical) imparts professional skills and knowledge, while Core area (Employability Skills) imparts requisite core skill & knowledge and life skills. After passing out the training program, the trainee is awarded National Trade Certificate (NTC) by DGT which is recognized worldwide.

### Candidates need broadly to demonstrate that they are able to:

- Read and interpret technical parameters/ documents, plan and organize work processes, identify necessary materials and tools;
- Perform task with due consideration to safety rules, accident prevention regulations and environmental protection stipulations;
- Apply professional skill, knowledge & employability skills while performing jobs.
- Document the technical parameters related to the task undertaken.

#### 2.2 PROGRESSION PATHWAYS

- Can join as Horticultural consultants, Horticultural technician, Plant Care Worker, Nursery Staffer, Pest Management, Horticultural Inspector, Gardener, General, Nurseryman, Planter.
- Can become Entrepreneur in the related field.
- Can join Apprenticeship programme in different types of industries leading to National Apprenticeship certificate (NAC).
- Can join Advanced Diploma (Vocational) courses under DGT as applicable.

#### 2.3 COURSE STRUCTURE

Table below depicts the distribution of training hours across various course elements during a period of one year: -

S No.	Course Element	Notional Training Hours
1	Professional Skill (Trade Practical)	1200
2	Professional Knowledge (Trade Theory)	240
3	3 Employability Skills 160	
	Total	1600

#### 2.4 ASSESSMENT & CERTIFICATION

The trainee will be tested for his skill, knowledge and attitude during the period of course through formative assessment and at the end of the training programme through summative assessment as notified by the DGT from time to time.

- a) The **Continuous Assessment** (Internal) during the period of training will be done by **Formative Assessment Method** by testing for assessment criteria listed against learning outcomes. The training institute has to maintain an individual trainee portfolio as detailed in assessment guideline. The marks of internal assessment will be as per the formative assessment template provided on www.bharatskills.gov.in.
- b) The final assessment will be in the form of summative assessment method. The All India Trade Test for awarding NTC will be conducted by **Controller of examinations, DGT** as per the guidelines. The pattern and marking structure are being notified DGT from time to time. **The learning outcome and assessment criteria will be the basis for setting question papers for final assessment. The examiner during final examination will also check the individual trainee's profile as detailed in assessment guideline before giving marks for practical examination.**

#### 2.4.1 PASS REGULATION

For the purposes of determining the overall result, weightage of 100% is applied for six months and one-year duration courses and 50% weightage is applied to each examination for two years courses. The minimum pass percent for Trade Practical and Formative assessment is 60% & for all other subjects is 33%. There will be no Grace marks.

#### **2.4.2 ASSESSMENT GUIDELINE**

Appropriate arrangements should be made to ensure that there will be no artificial barriers to assessment. The nature of special needs should be taken into account while undertaking the assessment. Due consideration should be given while assessing for teamwork, avoidance/reduction of scrap/wastage and disposal of scrap/waste as per procedure, behavioral attitude, sensitivity to the environment and regularity in training. The sensitivity towards OSHE and self-learning attitude are to be considered while assessing competency.

Assessment will be evidence based comprising the following:

- Job carried out in labs/workshop
- Record book/ daily diary
- Answer sheet of assessment
- Viva-voce
- Progress chart
- Attendance and punctuality
- Assignment
- Project work

Evidences and records of internal (Formative) assessments are to be preserved until forthcoming examination for audit and verification by examining body. The following marking pattern to be adopted while assessing:

Performance Level	Evidence	
(a) Weightage in the range of 60%-75% to be allo	otted during assessment	
For performance in this grade, the candidate should produce work which demonstrates attainment of an acceptable standard of craftsmanship with occasional guidance, and due regard for safety procedures and practices	<ul> <li>Demonstration of good skills and accuracy in the field of work/ assignments.</li> <li>A fairly good level of neatness and consistency to accomplish job activities.</li> <li>Occasional support in completing the task/ job.</li> </ul>	
(b) Weightage in the range of 75%-90% to be allotted during assessment		
For this grade, a candidate should produce work which demonstrates attainment of a reasonable standard of craftsmanship, with	<ul> <li>Good skill levels and accuracy in the field of work/ assignments.</li> <li>A good level of neatness and consistency</li> </ul>	

little	guidance,	and	regard	for	safety
procedures and practices					

to accomplish job activities.

• Little support in completing the task/job.

## (c) Weightage in the range of more than 90% to be allotted during assessment

For performance in this grade, the candidate, with minimal or no support in organization and execution and with due regard for safety procedures and practices, has produced work which demonstrates attainment of a high standard of craftsmanship.

- High skill levels and accuracy in the field of work/ assignments.
- A high level of neatness and consistency to accomplish job activities.
- Minimal or no support in completing the task/job.

Gardener, General; (Mali General) grows flowers, trees, shrubs, seedlings, vegetables, etc. in public or private gardens. Prepares soil and sows seeds, plants, seedlings etc. Waters seed-beds and growing plants. Weeds and hoes garden and prunes hedges and bushes. Sprays and dusts pesticides and evolves other measures to protect plants from diseases and wild animals. Prepares soil and lays lawn. Waters mows and levels lawns. Prepares paths and ensures their proper up-keep. Collects and preserves seeds for sowing. Supervises labourers engaged for assistance. Keeps implements etc. in good working order. May maintain green house for display. May cultivate vegetables and fruit trees. May specialize in ornamental gardening. May work in nursery for improving variety of plants from seeds, cuttings, grafting or budding and be designated as MALI, NURSERY. May sell plants, buy seeds, fertilizers, insecticides, etc. May pay wages to labourers employed.

Nurseryman; Mali, Nursery manages nursery on own account, or on behalf of employer to grow trees, plants, flowers, shrubs, creepers, seeds, bulbs etc. in open air or green houses for sale to customers. Decides kind and number of plants to be grown and method of planting, cultivating and treatment based on soil, climatic conditions, irrigation facilities etc. Selects and purchases seeds, fertilizers, insecticide. Equipment and machinery and other items. Plans preparation of beds and method of planting, depending on type of plants to be grown. Prepares bed by various processes such as breaking soil, mixing fertilizers, etc. sows seeds, plants, seedlings, cuttings or propagates plants by grafting, budding and other methods and makes water channels. Watches growth of sapling, seedlings, grafts and plants. Hoes and prunes excess growth and off-shoots of plants, dusts and sprays pesticides and takes other measures to protect plants from pets, wild animals, etc. Observes development of plants. Develops methods of grafting and budding./ Collects and preserves seeds for sale. Hires labour if necessary and undertakes planting, weeding, pruning etc. as required. Supervises their work and trains them. Maintains buildings and equipment in good condition. Keeps records of cost and production statement. Sells seedling, seeds, bulbs etc. May specialize in landscape planting.

**Planter**; manages plantation on own account to grow plantation crops such as tea, coffee, rubber, etc. Arranges to procure seed according to type of crop such as tea, coffee, rubber, etc. Determines kinds of crop to be grown. Gets land cleared and prepared for growing crops by digging, ploughing, harrowing etc. Organizes and supervises various farm operations, sowing, manuring, weeding, spraying insecticide, and protection of crop from destruction by wild animals. Arranges harvesting of crop and supervises plucking, tapping and threshing of leaves, etc. Ensures proper maintenance and development of plantation estate. Maintains records relating to cost of production, sale and other accounts. May conduct research and organize demonstration. May arrange preservation of produce and partially process them prior to

marketing. Is designated as Planter, Tea; Planter, Coffee; Planter, Cinchona; Planter, Cocoa; Planter, Rubber according to type of crop grown.

#### Reference NCO-2015:

- (i) 6113.0301 Gardener, General
- (ii) 6113.0200 Nurseryman
- (iii) 6113.0100 Planter

## 4. GENERAL INFORMATION

Name of the Trade	HORTICULTURE
Trade Code	DGT/1063
NCO - 2015	6113.0301, 6113.0200, 6113.0100
NSQF Level	Level-4
Duration of Craftsmen Training	One Year (1600 Hours)
Entry Qualification	Passed class 10 <sup>th</sup> examination
Minimum Age	14 years as on first day of academic session.
Eligibility for PwD	LD, CP, LC, DW, AA, LV, DEAF, HH, AUTISM, ID, SLD
Unit Strength (No. of Student)	24 (There is no separate provision of supernumerary seats)
Space Norms	1000 Sq. m
Power Norms	2 KW
Instructors Qualification f	or:
(i) Horticulture Trade	B.Voc/B.E/B.Tech in Agriculture/Horticulture from AICTE/UGC recognized university with one-year experience in the relevant field.  OR
	B.Sc (Agriculture/Horticulture) from UGC recognised university with two years' experience in the relevant field.
	OR  Advanced Post Graduate Diploma (Minimum 2 years) in Horticulture/ Agriculture from recognized board of education or relevant Advanced Diploma (Vocational) from DGT with two years' experience
	in the relevant filed.
	OR
	NTC/NAC passed in the trade of "Horticulture" or "Floriculture and Landscaping" with three years' experience in the relevant field.
	Essential Qualification: Relevant National Craft Instructor Certificate (NCIC) in any of the variants under DGT.
	Note:- Out of two Instructors required for the unit of 2(1+1), one

	_	must have Degree/Diploma and other must have NTC/NAC qualifications. However, both of them must possess NCIC in any of its variants.		
(ii) Employability Skill	MBA/ BBA / Any Gra	duate/ Diploma in any di	scipline with Two years'	
	experience with sho	ort term ToT Course in E	mployability Skills from	
	DGT institutes.			
	· ·	ed English/ Communica Diploma level and above)		
		OR		
	Existing Social Studie	es Instructors in ITIs with	short term ToT Course	
	in Employability Skill	s from DGT institutes.		
(iii) Minimum Age for	21 Years			
Instructor				
Distribution of training	on Hourly basis: (Indicat	Hourly basis: (Indicative only)		
Total Hrs /week	Trade Practical	Trade Theory	Employability Skills	
40 Hours	30 Hours	6 Hours	4 Hours	

Learning outcomes are a reflection of total competencies of a trainee and assessment will be carried out as per the assessment criteria.

### **5.1 LEARNING OUTCOMES (TRADE SPECIFIC)**

- 1. Identify metrological instruments and the diversity within the profession of horticulture following safety precautions.
- 2. Plan and prepare life cycles of plants, scope of horticulture and introduction to fruits, flowers & vegetables.
- 3. Classify fruits and vegetables based on season and edible parts.
- 4. Install agro-meteorology instruments, analyze metrological data and record the data.
- 5. Identify, select and maintain different farm power machinery.
- 6. Measure physical and chemical properties of soil, soil pH, different methods and ingredient use for correction of Acid soil.
- 7. Plan, install and use different irrigation systems, Water lifting systems and water quality assessment systems.
- 8. Identify different types of soil, methods of soil sampling and collection, study on soil physical characters, Interpret soil test reports and different soil correction methods.
- 9. Analyze Soil water holding capacity, Different methods and ingredients used for correction of Saline soil. Field visit for identification of soil problems.
- 10. Plan and execute different soil correction method through drainage and agronomic practices.
- 11. Measure soil fertility and apply soil fertility management for improvement of fertility of soil.
- 12. Apply Integrated Nutrient Management System (INMS) in the field.
- 13. Identify, prepare and apply Bio-fertilizers.
- 14. Identify the role of major and minor plant nutrients and its deficiency symptoms.
- 15. Produce different types of fruits, vegetables and flowers as per the requirements.
- 16. Apply various cultivation techniques & methods to fruit crops & vegetable farms.
- 17. Plan and execute different garden layouts and designs.
- 18. Identify and select different Vegetative propagation method & use of plant hormones.
- 19. Apply propagation techniques viz cutting, grafting, budding and layering.
- 20. Process and preserve vegetables and fruits using different techniques to prepare jam, jelly, squash, sauce, pickle, ketchup etc. its preservation and storage.
- 21. Develop the Cultivation techniques of different vegetables and spice crops.
- 22. Perform Floriculture and cultivation techniques for different Flowers, Climbers, Foliages and Medicinal plants to decorate.
- 23. Perform Cultivation of Betel Vine and Mushroom farming.

- 24. Apply Pest Management and control the Pest and Diseases of Horticultural Crops.
- 25. Use techniques of Seed Production, Processing and Packaging.
- 26. Maintain the records viz. Inventory Control, Maintenance of Records and Store management.
- 27. Conduct Market Survey and follow the legal requirement for trading as part of entrepreneurship development.

LEA	RNING OUTCOMES	ASSESSMENT CRITERIA
1. lo	dentify metrological	Importance of different elements of weather and climate in
ir	nstruments and the	agriculture.
d	diversity within the	Knowledge on different agro-climatic regions of the country.
	orofession of	Knowledge on crops grown relating to seasonal pattern, its field
	norticulture	preparation methods, sowing and harvest.
	following safety	Identify different meteorological instruments and its use.
р	orecautions.	Observe the different meteorological data and draw sketches.
		Knowledge on fundamentals of horticulture.
		Identification of plants based on botanical classification.
		List-out common names and botanical names.
		Describe the commercial importance of horticulture plants.
2. P	Plan and prepare life	Knowledge on classification of horticultural plants.
	cycles of plants,	Knowledge on fruits, flowers and vegetables.
	scope of horticulture	Illustrate the life cycles of selected plants through sketches and
	and introduction to	diagram.
	ruits, flowers &	List out common fruits and vegetables in the country according to
V	vegetables.	agro-ecological situation.
	oc c	
	Classify fruits and	Knowledge on classification of fruits and vegetables based on season
	vegetables based on	and edible parts.
	season and edible	Identify fruits on the basis of shape, color, aroma etc.
P	parts.	Identify fruits and vegetables through field study.
4. Ir	nstall agro-	Knowledge on different special weather phenomena and hazard
	neteorology	weather events.
	nstruments, analyze	Knowledge on the effect of natural disasters on crops and crop
	metrological data	management.
	and record the data.	Install meteorological instruments.
		Knowledge of weather forecasting and its implication.
		Analyze different meteorological data.
		Knowledge on metric system of area and weights.
		Calculate weight and measures.
		Convert units of weights, acres to hectares.
		Knowledge on land records, cadastral map, measurement of plots.

	Perform the use of electrical balance for measuring milligram fractions
	of chemicals.
5. Identify, select and	Knowledge on Farm power machinery.
maintain different	Knowledge on different agricultural implements, harvesting and post-
farm power	harvest equipments.
machinery.	Identify different farm implements.
	Demonstrate ploughing, harrowing and laddering.
	Demonstrate the handling and care of seed drill, wheel hoe, sprayer,
	duster, pedal thresher.
	Calibrate and fix seed drill, wheel hoe, paddy weeder, MB plough.
	Demonstrate the operation of pump set.
	Identify parts of farm implements and draw sketches.
	Knowledge on farm power, farm electricity and electrical power-driven
	machineries like motors.
	Knowledge on renewable sources of energy devices.
	Use of tractor, power tillers and rotavator.
	Identify different plant parts and demonstrate germination.
6. Measure physical	Knowledge on soil properties and its formation.
and chemical	Knowledge on different soil management practices like soil moisture
properties of soil,	conservation technique, soil erosion control and soil conservation.
soil pH, different	Knowledge on properties of water and water conservation.
methods and	Methods of water harvesting.
ingredient use for	Identify watershed resources and drawing of watershed maps.
correction of Acid	Knowledge on aquifer and aquifer recharging technique.
soil.	Knowledge on chemical properties of soil.
	List out different methods for correction of acid soil.
	Execute measurement of soil pH by litmus method and electronic pH
	meter.
	Determine the rate of application of lime, sludge, wood ash, dolomite,
	basic slag and rock phosphate for correction of acid soil.
7. Plan, install and use	Knowledge on irrigation.
different irrigation	Concept on different type and methods of irrigation.
systems, Water	Methods of water lifting.
lifting systems and	Knowledge on water quality.
water quality	Install different irrigation systems.

	assessment systems.	Methods for control of water loss.
		Knowledge on drainage, its type and control technique.
8.	Identify different	Knowledge on physical soil properties like soil texture, porosity, bulk
	types of soil,	density, particle density.
	methods of soil	Knowledge on soil structure, water holding capacity, pH, EC, CEC, soil
	sampling and	solution.
	collection, study on	Identify soil by its texture.
	soil physical	Demonstrate soil sampling method, collection of soil, and procedure
	characters, Interpret	for sending to soil testing laboratory.
	soil test reports and	Analyze and interpret soil and fertilizer testing report.
	different soil	Knowledge different soil correction methods.
	correction methods.	
9.	Analyze Soil water	Determine soil water holding capacity.
	holding capacity,	Knowledge on correction of saline soil.
	Different methods	List out different methods for correction of saline soil.
	and ingredients used	Methods of cultivating salt tolerant crops.
	for correction of	Select saline, acid soil and identify the problem.
	Saline soil. Field visit	
	for identification of	
	soil problems.	
10	. Plan and execute	Knowledge on correction methods of Alkaline soil.
	different soil	Determine the rate of application of Sulphur and Gypsum for
	correction method	correction of alkaline soil.
	through drainage	Knowledge on soil organic matter.
	and agronomic	Knowledge on the effect of organic matter on soil properties, soil
	practices.	microbes, soil fertility and C/N ratio of soil
		Methods of recycling of organic matter.
		Identification of Azolla, BGA, its method of collection and
		multiplication.
11	. Measure soil fertility	Knowledge on soil fertility and soil fertility management.
	and apply soil	Knowledge on fertilizer and organic manures.
	fertility management	List out different methods of composting
	for improvement of	Differentiate between FYM, sludge, poultry manure, vermin compost

fortility of soil	and NADED compact
fertility of soil.	and NADEP compost.
	Execute the process of vermin compost and NADEP compost
	Evaluate the nutrient content of FYM, sludge, poultry manure, vermin
	compost and NADEP compost.
	Describe the role of different organic matter on improving soil quality.
12. Apply Integrated	Knowledge on Integrated Nutrient Management System (INMS).
Nutrient	Knowledge on green manure crops, its cultivation and package of
Management System	practice.
(INMS) in the field.	Identify seeds of different green manure crops.
	Identify different green manure crops.
	List out different green manure crops.
	Demonstrate and describe the methods of incorporation of green
	manure crops for improving soil fertility.
13. Identify, prepare and	Knowledge on bio-fertilizer, its concept and classification.
apply Bio-fertilizers.	Identify different biofertilizers.
	Prepare different biofertilizers.
	Demonstrate field application technique of biofertilizers.
	Describe the use of different biofertilizers like Azotobacter sp.,
	Phosphate and Potash solubilizing bacteria and Rhizobium sp.
	Knowledge on mycorrhiza, its availability, propagation and field
	application.
14. Identify the role of	Knowledge on major and minor plant nutrient elements.
major and minor	List out major and minor plant nutrients and their role.
plant nutrients and its	Identify fertilizer and micronutrient containing chemicals.
deficiency symptoms.	Identify deficiency symptoms of nutrient elements.
	Knowledge on the practice of different methods of micro-nutrients
	application.
	Knowledge on chemical fertilizers.
	List out different chemical fertilizers.
	Calculate different chemical fertilizer doses for field application.
	Determine the time for fertilizer application.
15. Produce different	Knowledge on present situation and scope of horticultural
types of fruits,	development.
vegetables and	Knowledge on different schemes in horticulture.
_	

flowers as per the	Identify the distribution area, productivity of different fruits,
requirements.	vegetables and flowers.
	Illustrate the importance of fruits and vegetables as protective food.
	List out the nutritional composition and value of fruits and vegetables.
	Knowledge on daily requirement of fruits and vegetables per person
16. Apply various	Knowledge on cultivation technique of different fruit crops.
cultivation	Knowledge on management of orchards.
techniques &	Demonstrate preparation of seed beds, sowing of seeds, seed
methods to fruit	treatment, transplanting and watering and its management.
crops & vegetable	Depict protection measures against adverse environment.
farms.	Knowledge on selection of planting materials, varieties, time of
	planting, spacing, manures and fertilizers and intercultural operation.
	Knowledge on harvesting time, grading and storage.
	Calculate crop yield.
	Demonstrate all necessary steps required for preparation of individual
	and group plots.
17. Plan and execute	Knowledge on making layouts and design for different plots.
different garden	Knowledge on roof top gardening.
layouts and designs.	Plan and execute home garden, roof top garden, individual
	instructional plots and field experimental design.
	Plan and execute plant nursery.
	Design and execute landscape garden.
18. Identify and select	
different Vegetative	Demonstrate different vegetative propagation techniques.
propagation method	Knowledge on the role of plant hormones.
& use of plant	Demonstrate the role of plant hormones on vegetative propagation
hormones.	and crop production.
19. Apply propagation	Knowledge on methods of cutting, grafting, budding and Layering
techniques viz	List out different techniques of grafting, budding and layering.
cutting, grafting,	Demonstrate different methods of grafting, budding and Layering.
budding and	Illustrate chip budding and T –budding with diagram.
layering.

20. Process and preserve	Depict the methods of fruits and vegetable preservation.

vegetables and fruits	Describe the importance of preservation.
using different	Demonstrate the steps like grading, washing, peeling and dehydration
techniques to	of fruits and vegetable by electrical and solar power.
prepare jam, jelly,	Demonstrate processing instruments and draw sketches.
squash, sauce,	Demonstrate the preparation of squash, jam, jelly, sauce & Pickles.
pickle, ketchup etc.	Knowledge on use of preservatives.
its preservation and	Illustrate the storing method of the processed materials.
storage.	Knowledge on maintenance of processed food standard and quality.
21. Develop the	Knowledge on cultivation of vegetables and spices.
Cultivation	Identify good planting materials and variety (OP and F1 Hybrid)
techniques of	Illustrate selection of suitable climate and planting time.
different vegetables	Demonstrate package of practice of different vegetables and spices
and spice crops.	like preparation of seed bed, transplanting, spacing for planting, dose
	of fertilizers and manures, intercultural operations, INMS, harvesting,
	grading, storage, transportation and marketing.
	Demonstrate rising of individual and community plots of Vegetables
	and spices.
22. Perform Floriculture	Knowledge on floriculture.
and cultivation	Identify different flowers, climbers and foliages.
techniques for	Illustrate the package of practice of different flowers, climbers and
different Flowers,	foliages like selection of clone, cutting, budding, grafting, layering,
Climbers, Foliages	preparation of seed bed, transplanting, spacing for planting, dose of
and Medicinal plants	fertilizers and manures, intercultural operations, INMS, harvesting,
to decorate.	grading, storage, transportation and marketing.
	Identify different medicinal plants.
	Illustrate the package of practice of different medicinal plants like
	selection of clone, cutting, layering, preparation of seed bed,
	transplanting, spacing for planting, dose of fertilizers and manures,
	intercultural operations, INMS, harvesting, grading, storage,
	transportation and marketing.
	Demonstrate care and management of potted plants.
	Knowledge on rising of individual, community and museum plots of
	flower.
	Identify suitable variety, planting material and planting time.
	Demonstrate plot preparation technique.
	Demonstrate intercultural operations and plant protection measures.
	· ·

	Knowledge on harvesting, sorting, packaging and marketing.		
23. Perform Cultivation	Illustrate package of practice of beetle vine, disease and pest		
of Betel Vine and	protection measures.		
Mushroom farming.	Design and construct Beetle vineyard.		
	Demonstrate propagation of beetle vine.		
	Illustrate package of practice of mushroom cultivation and disease		
	prevention measures.		
	Design and construct mushroom shade.		
	List out different edible mushroom varieties.		
	Knowledge on harvesting, sorting, packaging and marketing of beetle		
	vine and mushroom.		
24. Apply Pest	Knowledge on pest management and Integrated pest management,		
Management and	classification of insect, pest and diseases.		
control the Pest and	Knowledge on bio-control agents and bio-pesticides.		
Diseases of	Identify major insect pest and diseases.		
Horticultural Crops.	Identify different classes of synthetic and bio –pesticides.		
	Demonstrate preparation of spray solution, dusts and its application		
	procedure.		
	Demonstrate preparation of Bordeaux mixture and its application.		
	Illustrate systemic waste disposal methods to prevent environmental		
	pollution.		
25. Use techniques of	Knowledge on seed production technology.		
Seed Production,	Determine quality of seeds.		
Processing and	Differentiate between breeder seeds, foundation seeds, certified		
Packaging.	seeds and TL seeds.		
	Demonstrate package of practices for seed production and processing		
	of seeds.		
	Illustrate the packaging requirement of seeds and modern seed		
	packaging techniques.		
	Knowledge on seed marketing, trade management and seed Act.		
26. Maintain the records	Knowledge on inventory control and maintenance of records.		
viz. Inventory	Demonstrate methods of store management.		
Control,	Perform stocking, issuing and stock verification.		
Maintenance of	Perform maintenance of farm records.		

Records and Store	
management.	
27. Conduct Market	Classify market types.
Survey and follow the	Perform market study.
legal requirement for	Demonstrate market survey techniques.
trading as part of	Execute tabulation and interpretation of data.
entrepreneurship	Depict trade, trading requirements and assess trade problems.
development.	Knowledge on licensing, registration, sales tax, other taxes, pricing of
	products.
	Visit trade centers and export houses.
	Knowledge on export of products.
	Knowledge on entrepreneurship.
	Execute workshop and group discussion programme.
	Execute field survey and project preparation.

## **SYLLABUS FOR HORTICULTURE TRADE**

	DURATION: ONE YEAR			
Duration	Reference Learning outcome	Professional Skills (Trade Practical) With Indicative Hours  Professional Knowledge (Trade Theory)		
Professional Skill 60Hrs; Professional Knowledge 12Hrs	Identify metrological instruments and the diversity within the profession of horticulture following safety precautions.	1. Agro-meteorology - Identification of meteorological instruments. (08 hrs.)  2. Making sketches with problems of recording of (07 hrs) (i) Rainfall, (ii) Temperature, (iii) Humidity, (iv) Wind direction and speed, Evaporation and (vi) Agro climatic regions (15 hrs.)  a) Importance of different elements of weather and climate in agriculture – rainfall, temperature, humidity, sunshine, wind speed and direction. Weather and climate of related state of the country – Annual and Seasonal pattern relating crop season, highlighting seasonal variation, Winter – Rabi, Monsoon – maturity and harvesting of Kharif crops and field preparation and sowing of Rabi crops. discipline and outward Signs. (06 hrs.)		
		<ol> <li>Introductory Horticulture. (04 hrs.)</li> <li>Fundamentals of Horticulture. (06 hrs.)</li> <li>Identification of plants according to botanical classifications. (10 hrs.)</li> <li>Commercial importance. Common names, botanical names. (10 hrs.)</li> </ol>		
Professional Skill 30Hrs;	Plan and prepare life cycles of plants, scope of	7. Making sketches and diagrams. Studying the life cycles of some selected plants.  Scope of horticulture.  Classification of horticultural plants.		

Professional Knowledge 06Hrs  Professional Skill 30Hrs;  Professional Knowledge 06Hrs	horticulture and introduction to fruits, flowers & vegetables.  Classify fruits and vegetables based on season and edible parts.	plants of each class. (25 Common fruits, flowers and vegetables grown in the vegetables grown in the country according to agroflowers and vegetables. (05 ecological situation and season (06 hrs.)  9. Identification of fruits – Classification of vegetables based on season and edible parts. (06 hrs.)  10. Identification of fruits and vegetables through field study. (15 hrs.)
Professional Skill 60Hrs; Professional Knowledge 12Hrs	Install agrometeorology instruments, analyze metrological data and record the data.	11. Installation of the above six instruments. (15 hrs)  12. Recording meteorological data. Visit to agrometeorological Stations. (10 hrs)  Weights and measures and land records – (08 hrs.)  13. Calculations on weights and measures. Study of land records. (07 hrs.)  14. Cadastral map, identification of plot and its measurement. (10 hrs.)  15. Practice & use of electrical Top-pan Balance for measuring milligram fractions of chemicals. (10 hrs.)  16. Installation of the above six weather phenomena and hazard weather events viz, cyclonic storm and storm surge, flood, drought, heat and cold wave, hail storm, western disturbances and associated weather events: Their nature, period and areas of occurrence and effect on crops and crop management. Weather forecast & its implication. Weights and measures: Concept of Metric System of area and weights, Conversion of units of acres to hectares. Brief idea about land records, Cadastral map, identification of plot and its measurement. (12 hrs.)
Professional Skill 60Hrs;	Identify, select and maintain different	16. Farm Machinery - Agricultural implements: Practices in ploughing, Country plough, MB plough,
Professional Knowledge 12Hrs	farm power machinery.	harrowing, laddering, (6 hrs.)  17. Use and care of seed drill, wheel hoe, handling of sprayer, duster and pedal harvesting equipments.  Bidhe, Wheel hoe, Paddy weeder, seed drill, pedal thresher, duster and sprayer, wheel hoe, handling of harvesting equipments.

	thresher. (6 hrs)	b) Types and application of
	18. Calibration and fitting,	Farm Power, Farm electricity,
	(6hrs)	renewable energy.
	(i) Fixing of seed drill,	c) Identification of different
	(ii) Wheel hoe,	plant parts
	(iii) Paddy weeder,	(12 hrs.)
	(iv) MB plough,	(12 111 3.)
	19. Operation of pump set.(6

		(iii) Visit to Export Houses	Entrepreneurship
		and Centers.	Development. (06 hrs.)

## **Project Work:**

## **Broad areas:**

- a) Fruits and Vegetable preservation.
- b) Collection of materials like fruits, vegetables.
- c) Process like grading, washing, peeling and dehydration by various techniques using solar or electrical power.

#### **SYLLABUS FOR CORE SKILLS**

1. Employability Skills(Common for all CTS trades) (160Hrs)

Learning outcomes, assessment criteria, syllabus and Tool List of Core Skills subjects which is common for a group of trades, provided separately in www.bharatskills.gov.in

	List of Tools &	Equipment	
	HORTICULTURE (For bate	ch of 24 Candidates)	
S No.	Name of the Tools and Equipment	Specification	Quantity
A. TRAIN	EES TOOL KIT (For each additional unit train	ees tool kit sl. 1-9 is requi	ired additionally)
1.	Measuring Tape	50 mtr	25 (24+1) Nos.
2.	Pocket pH meter		25 (24+1) Nos.
3.	Magnifying Glass		25 (24+1) Nos.
4.	Budding and grafting knife		25 (24+1) Nos.
5.	Apron		25 (24+1) Nos.
6.	Safety goggles		25 (24+1) Nos.
7.	Hand gloves		25 (24+1) Nos.
8.	Safety shoes		25 (24+1) Nos.
9.	Helmet		25 (24+1) Nos.
B. SHOP	TOOLS, INSTRUMENTS – For 2 (1+1) units no	o additional items are req	uired
Lists of To	ools:		
10.	Spade		25 Nos.
	a. With long Handle		
	b. With Short Handle		
11.	Kudali		25 Nos.
12.	Khurpi		25 Nos.
13.	Hand hoe		25 Nos.
14.	Secateur		25 Nos.
15.	Pruning Saw		12 Nos.
16.	Budding & Grafting Knives		12 Nos.
17.	Rake		12 Nos.
18.	Rose Cane		5 Nos.
19.	Sprayer		
	a) Foot Sprayer		2 Nos.
	b) Hand Sprayer		4 Nos.
	c) Battery Operated Sprayer		4 Nos.
20.	Transplanting shovel		12 Nos.
21.	Measuring tap		5 Nos.
22.	Different types of ropes		12 Kg

23.	Different types of labels		5000 Nos.
24.	Stackes		5000 Nos.
25.	Lawn mover		1 No.
26.	Duster		2 Nos.
27.	Pruning knives		5 Nos.
28.	Hedge shears		5 Nos.
29.	Grass shears		5 Nos.
30.	Deshi plough		5 Nos.
31.	Tagari (Basket)		12 Nos.
32.	Hot Plate		1 No.
33.	Physical balance & weight box		1 No.
	Digital Balance	1gm to 5 kg	1 No.
34.	Sprinkler		1 No.
	Micro sprinkler Set		1 No.
	Drip irrigation Set		1 No.
	Fogger		1 No.
35.	Sword		1 No.
36.	Cutting, peeling, coring and pitting knives		12 Nos. each
37.	Spoons and forks		6 Nos.
38.	Counter pan balance with weights		1 No.
39.	Avery weighing scale		1 No.
40.	Physical balance		1 No.
41.	Pocket refractometer	0-30, 30-60, 60-90	1 No.
42.	Thermometer	$0^{0}c - 15^{0}c$	1 No.
43.	Brix hydrometer	0-30 c, 30-60c, 60-90c	1 No.
44.	Can vacuum testing gauge		1 No.
45.	Jelmeter		1 No.
46.	A simple R, O, sealing machine for bottles and jars		1 No.
47.	Can sealing machine manually- operated similar to Dixie sealer or the power driven		1 No.
48.	Crown corking machine, manually operated		1 No.
49.	Pressure cooker, burpee type		1 No.

51.	Basket press, screw type juice		1 No. each
	extractor, manual.		
52.	Lemon squeezers		12 Nos.
53.	Carbonation unit		1 Set
54.	Vinegar generator		1 Set
55.	Cans, bottles, jars, closures, labels as		
	required		
56.	pH Meter		1 Set
57.	Evaporimeter		1 Set
58.	Wheel Hoe		1 Set
59.	Seed Drill		1 Set
60.	Pedal Thresher		1 Set
C. LIST OF	EQUIPMENT		
61.	Plastic bucket		15 Nos.
