Data Sufficiency దత్తాంశ పర్యాప్తత

Note: In questions numbered 1 to 20, a question is followed by data in the form of two statements labeled as I and II. You must decide whether the data given in the statements are sufficient to answer the questions. Using the data make an appropriate choice from (1) to (4) as per the following guidelines:

- a) Mark choice (1) if the statement I alone is sufficient to answer the question.
- b) Mark choice (2) if the statement **II** alone is sufficient to answer the question.
- c) Mark choice (3) if both the statements I and II are sufficient to answer the question but neither statement alone is sufficient.
- d) Mark choice (4) if both the statements **I** and **II** together are not sufficient to answer the question and additional data is required.

సూచన: 1 నుండి 20 వరకు ఇచ్చిన ప్రతి ప్రశ్న లోను ఒక ప్రశ్న , దాని కింద I, II అని గుర్తులు గల రెండు ప్రవచనాలు దత్తాంశంగా ఇవ్వబడ్డాయి. ఇచ్చిన దత్తాంశం ఉపయోగించి, ఇచ్చిన ప్రవచనాలు ప్రశ్న కు సమాధానాన్ని ఇచ్చేందుకు పర్యష్తాలు అవుతాయా లేదా అని మీరు నిర్ధారించాలి. ఈ నిర్ధారణకు క్రింది మార్గదర్శక సూత్రాలు ఉపయోగించి (1) నుండి (4) వరకు సరి అయిన జవాబును ఎంపిక చెయ్యండి.

- a) ప్రశ్నకు సమాధానం ఇచ్చేందుకు ప్రవచనం I మాత్రమే పర్యాప్తమయితే మీ జవాబు (1) గా గుర్తించండి .
- b) ప్రశ్నకు సమాధానం ఇచ్చేందుకు ప్రవచనం II మాత్రమే పర్యాప్తమయితే మీ జవాబు (2) గా గుర్తించండి.
- c) ప్రశ్నకు సమాధానం ఇచ్చేందుకు ప్రవచనాలు I, II కలిసి పర్యాప్తమయ్యి అందులో ఏ ఒక్కటి కూడా పర్యాప్తం కాకపోతే మీ జవాబు (3) గా గుర్తించండి.
- d) ప్రశ్నకు సమాధానం ఇచ్చేందుకు ప్రవచనాలు I, II కలిసి కూడా పర్యాప్తం కాక అదనపు దత్తాంశం అవసరం అయితే మీ జవాబు (4) గా గుర్తించండి.

Question Id: 7473902454 Sub Question Shuffling Allowed: Yes Group Comprehension Questions: No Question Pattern Type: NonMatrix Calculator: None Response Time: N.A Think Time: N.A Minimum Instruction Time: 0

Question Numbers: (126 to 130)

Read the following Passage and answer the Questions (126-130) given below:

The professor more than any other person finds himself shut out from the general society of the business world. The rest of the interests have, after all, some things in common. The circles intersect at various points. Iron and steel have a certain fellowship with pulp and paper, and the whole lot of them may be converted into the common ground of preference shares and common stock. But the professor is to all of them an outsider. Hence his natural dissimilarity is unduly heightened in its appearance by the sort of a vocational isolation in which he lives. Let us work further into the status and setting of the man. To begin with, history has been hard upon him. For some reason the strenuous men of activity and success in the drama of life have felt an instinctive scorn of the academic class, which they have been at no pains to conceal. Bismarck knew of no more bitter taunt to throw at the Free Trade economists of England than to say they were professors. Napoleon felt a lifelong abhorrence of the class, broken only by one brief experience that ended in failure. He invited sixty five professors to his palace, but at the end of half an hour Napoleon had had enough of the professors. "Put them all out", he cried and never again were they admitted into his presence.

Question Numbers : (131 to 135)

Read the following Passage and answer the Questions (131-135) given below:

There are basically three choices available to you when trying to influence people. The first is to ignore people and simply hope they will act in your best interest. You probably will agree that this is not a very practical option, since the results can be neither effective nor predictable. By ignoring other people, you are giving up any hope of influencing them and thus are surrendering yourself to the whims of fate. In effect, you are saying to the world, "I will leave you alone and, in return, I want you to do what I want", a naïve and unrealistic expectation.

The second option is to use coercion and force to compel others to act in the specific way you desire. The use of threats and intimidation may produce results, at least in the short term. Fear-inducing tactics, however, never bring out the best in the people, since people themselves must be the driving force behind their motivation if they are to put their hearts and souls into what they are doing. Fear forces people to operate in a survival mode. They may follow your instructions and orders to the letter, but seldom will they contribute any real energy or enthusiasm to their efforts.

The third option is to persuade people to do what you want them to do simply because they really want to. People will do what you want them to do willingly in direct proportion to how they see their self-interest being served. In other words, you must convince people that they will receive real benefits and rewards if they follow the path you are suggesting. These benefits must be something the other party understands and inherently wants, for whatever reason. In effect, you are offering a reward that is valued by others in exchange for a reward that is valued by you. The highest reward you can offer people is to provide them with opportunities to maximize their full potential.

Ouestion Numbers: (136 to 140)

Read the following Passage and answer the Questions (136-140) given below:

The Recording Industry Association of America (RIAA) estimates music piracy is the source of over four billion dollars each year in lost profits. Though music piracy is a general term that encompasses a broad array of illegal practices involving the duplication and distribution of recorded music (such as counterfeiting and bootlegging for personal monetary profit), the one area of piracy that occupies the majority of the nation's attention is the contentious practice of music file sharing on peer-to-peer (P2P) websites. Despite the RIAA's recent crackdown on illegal file-sharing by levying heavy fines against offenders, P2P websites are still thriving. Though there is a small minority of the file-sharing population who truly believe they should not have to pay to listen to their favorite music, this percentage hardly occupies the lion's share of illegal down loaders. So why are so many people breaking the law? RIAA equates the illegal downloading of an album of music to the act of shop lifting that same album from a record store, and they have a logically sound argument. However, the dubious act of physically pilfering something from a record store, and all the tangible consequences it entails, is hardly present in the action of pressing a keyboard button from the repose of one's home.

Question Numbers: (141 to 145)

Read the following Passage and answer the Questions (141-145) given below:

The importance of data visualization is simple: it helps people see, interact with, and better understand data. Whether simple or complex, the right visualization can bring everyone on the same page, regardless of their level of expertise.

While we'll always wax poetically about data visualization, there are practical, real-life applications that are undeniable. And, since visualization is so prolific, it's also one of the most useful professional skills to develop. The better you can convey your points visually, whether in a dashboard or a slide deck, the better you can leverage that information. The concept of the citizen data scientist is on the rise. Skill sets are changing to accommodate a data-driven world. It is increasingly valuable for professionals to be able to use data to make decisions and use visuals to tell stories of when data informs the who, what, when, where, and how.

While traditional education typically draws a distinct line between creative storytelling and technical analysis, the modern professional world also values those who can cross between the two: data visualization sits right in the middle of analysis and visual storytelling.
