**1 × 4 = 4 (2 × 2)**

43. Garbage is a great environment hazard. It comes from various sources — used paper, tiffin packings, plastic bags, ice-cream wrappers, bottle caps, fallen leaves from trees and many more. Garbage makes the premises ugly, unkempt and breeds diseases.

A lot of trash that is thrown away contain material that can be recycled and reused such as paper, metals and glass which can be sent to the nearest recycling centre or disposed of to the junk dealer. It also contains organic matter such as leaves which can enrich soil fertility. A compost pit can be made at a convenient location where the refuse can be placed with layers of soil and an occasional sprinkling of water. This would help decomposition to make valuable fertilizer. This would also prevent pollution that is usually caused by burning such organic waste.

*Questions :*

- a) What are the various sources of garbage ?
- b) How does a compost pit help in making a valuable fertilizer ?

**XII. Write an essay of about 18-20 sentences on any one of the following**

**topics :**

**1 × 5 = 5**

- 44. a) Need for value based education
- b) Advantages and disadvantages of internet in students' life.
