Some people think that the aim of education is merely to give knowledge. Others believe that knowledge alone is not enough but that which enables a man to earn his living can be called education. Still others believe that education should aim solely at making good citizens and good patriots. As a matter of fact, education should aim at all these three things together. It should give men knowledge, make them self-reliant and able to serve others. It should produce men who love their own country but who do not want to harm other countries.
