GOA BOARD OF SECONDARY AND HIGHER SECONDARY EDUCATION

ALTO-BETIM GOA 403521

Rationalised syllabus 2025 – 2026

Sub: Mathematics (Level 1 and Level 2)
Grade 10

Chapter	Dropped topics (Level 1)	Dropped topics (Level 2)
1: Real Numbers	1.2 Euclid's Division Lemma 1.5 Revisiting Rational Numbers and their Decimal Expansions	1.2 Euclid's Division Lemma 1.5 Revisiting Rational Numbers and their Decimal Expansions
2: Polynomials	2.4 Division Algorithm for Polynomials	2.4 Division Algorithm for Polynomials
3: Pair of linear equations in two variables	3.4.3 Cross – Multiplication Method 3.5 Equation Reducible to a Pair of Linear Equations in Two Variables.	3.4.3 Cross – Multiplication Method 3.5 Equation Reducible to a Pair of Linear Equations in Two Variables.
4: Quadratic equations	4.4 Solution of a Quadratic Equation by Completing the Square	4.4 Solution of a Quadratic Equation by Completing the Square * Word problems
5: Arithmetic Progressions	No Deletions	No Deletions
6: Triangles	6.5 Areas of Similar Triangles 6.6 Pythagoras Theorem	6.5 Areas of Similar Triangles 6.6 Pythagoras Theorem * Riders
7: Coordinate geometry	7.4 Area of a Triangle	7.4 Area of a Triangle
8: Introduction to Trigonometry	8.4 Trigonometric Ratios of Complementary Angles	8.4 Trigonometric Ratios of Complementary Angles
9: Some applications of Trigonometry	No Deletions	No Deletions
10: Circles	No Deletions	No Deletions
11: Construction	Entire chapter deleted	Entire chapter deleted

12: Areas Related to Circles	12.4 Areas of Combinations of Plane Figures	12.4 Areas of Combinations of Plane Figures
13: Surface Areas and Volumes	13.4 Conversion of Solid from one Shape to Another 13.5 Frustum of a Cone	13.4 Conversion of Solid from one Shape to Another 13.5 Frustum of a Cone
14: Statistics	14.5 Graphical Representation of Cumulative Frequency Distribution	14.5 Graphical Representation of Cumulative Frequency Distribution * Finding mean by Step – Deviation method
15: Probability	No Deletions	No Deletions
*Logarithms (PDF)	No Deletions	No Deletions

Note: For Level 2 (Basic)

1)   *In the Chapter Pair of Linear Equations in Two Variables word problems involving only lower order thinking skills to be included.*

2) *In the Chapter Introduction to Trigonometry, proving trigonometric identities involving only lower order thinking skills to be included.*

3) *In the Chapter Some Applications of Trigonometry, word problems on heights and distances involving only one angle (either angle of elevation or depression) to be included.*

GOA BOARD OF SECONDARY AND HIGHER SECONDARY EDUCATION

ALTO-BETIM GOA 403521

Exhaustive list of Activities to be performed as Internal Assessment 2025 – 2026

Sub: Mathematics (Level 1 and Level 2)
Grade 10

Sr.no.	TITLE OF ACTIVITY
1)	To find the mean, median and mode of data collected and draw its cumulative frequency curves.
2)	Body Mass Index (BMI).
3)	Relationship between volume of a Cylinder and volume of a Cone having equal heights and equal base areas.
4)	To estimate the number of tiles required for the floor of a classroom and cost of painting its walls.
5)	Comparing the volume of Cylinders obtained by folding a rectangular tin/cardboard/thick chart paper sheet along its length and breadth.
6)	To investigate the relationship between the dimensions of a Cuboid, its total surface area and volume.
7)	Fibonacci sequence and Golden rectangle.
8)	Pascal's Triangle.
9)	To measure heights and distances using a Clinometer.

Activity1: To find the mean, median and mode of data collected and draw its cumulative frequency curves.

Aim: To find the mean, median and mode of the data collected and draw its cumulative frequency curves.

Guidelines for students:

- Collect data [for example – marks obtained in mathematics by the SSC students of the previous year.]
- Construct a grouped frequency distribution table.
- Find the mean of the data by direct, assumed and step-deviation methods.
- Find the median and the mode of the data.
- Verify the empirical relationship between the three measures of central tendency.
- Draw cumulative frequency curves of the less than type and the more than type on a graph paper.
- Find the median of the data from the graph.

Learning outcomes:

This activity will help the students to

- gain practical knowledge of collecting data and calculating mean, median and mode of grouped data.
- understand the graphical representation of cumulative frequencies.
- enhance their statistical and graphical skills in analyzing and interpreting data.
- appreciate the practical application of descriptive statistics and graphical methods in summarizing data.

2

Activity 2: Body Mass Index (BMI)

Aim: To calculate the Body Mass Index (BMI) of school students and its implications on personal health **Guidelines for students:**

- Explore the concept of BMI, the BMI categories: underweight, normal weight, overweight and obesity and their implications on health.

- Select minimum ten schoolmates and record their height (in meters) and weight (in kilograms) in the table given below:

Schoolmate	height(m)	weight(kg)	$BMI = \dfrac{weight}{(height)^2}$	Inference
1.				
2.				
10.				

- Calculate the BMI for each selected schoolmate using the formula:

    $BMI = \text{weight} \div (height)_2$; *where weight is in kg and height is in meters*

- Record the calculated BMI values in the above table and draw inference with the help of the table given below:

BMI	INFERENCE
below 18.5	underweight
18.5 -24.9	healthy
25 and 29.9	overweight.
30 & above	obesity

- Calculate the average BMI and the percentage of students of the different categories for the selected group of school mates.

- Represent the data using a pie chart.

Note: The BMI of students of the whole school (if number is less) can finally be compiled and represented by a pie chart.

Learning outcomes:

This activity will help the students to

- gain practical experience in calculating BMI and analyzing health data.

- understand the importance of BMI in assessing and maintaining personal health.

- promote awareness of healthy lifestyle choices and provide guidance on maintaining a balanced BMI.

Activity 3: Relationship between volume of a Cylinder and volume of a Cone having equal heights and equal base areas.

Aim : To find the relationship between volume of a Cylinder and volume of a Cone having equal heights and equal base areas.

Guidelines for students:

- Prepare a Cylinder and a Cone having same height and base area using thick chart paper/cardboard.

- Calculate the volume of the Cylinder and the Cone using the formulae.
- Compare the calculated volumes of the Cylinder and the Cone.
- Verify the relationship by filling the Cone with fine sand/salt to its brim and emptying it in the Cylinder until it is completely filled.

Learning outcomes:

   This activity will help the student to

- gain practical experience in making geometric shapes (Cylinder and Cone)

- find out and appreciate the relationship between the volume of Cylinder and Cone having equal heights and equal base areas leading to a deeper understanding of the concept of volume of Cylinder and Cone.

Activity 4: To estimate the number of tiles required for the floor of a classroom and cost of painting its walls.

Aim: To draw the floor plan of a classroom and estimate the number of tiles needed for the floor and the amount of paint required for the 4 walls. **Guidelines for students :**

- Measure the length, breadth and height of a classroom.
- Measure the length and breadth of the door and windows of the classroom.
- Draw the plan of the classroom, including doors and windows on a graph paper by choosing an appropriate scale for the above measurements.
- Calculate the total floor area of the classroom.
- Find the dimensions of the tile to be used for the floor and calculate its area.
- Calculate the number of tiles needed to cover the entire floor area.
- Estimate the number of tile boxes required for the entire floor assuming that there are 10 tiles in each box.
- Calculate the total area of the 4 walls.
- Calculate the total area of the door and windows.
- Calculate the area to be painted.
- Find the cost of painting the 4 walls given the cost per square meter and estimate the amount of paint required in litres to paint the 4 walls.
  Learning Outcomes:

This activity will help the students to

- gain practical experience in taking measurements, drawing plan, calculating area, and estimating material requirements for tiling and painting.

- enhance their skills in measurement, area calculation and estimation.

FLOOR PLAN OF A CLASSROOM
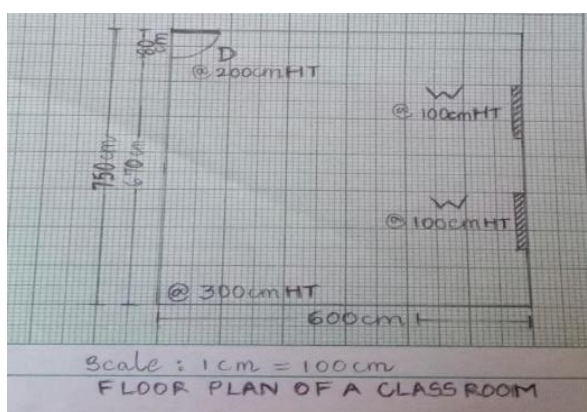

Activity 5: Comparing the volume of Cylinders obtained by folding a rectangular tin/cardboard/thick chart paper sheet along its length and breadth.

Aim: To compare the volumes of right circular Cylinders obtained by folding a rectangular tin sheet/cardboard/thick chart paper along its length and breadth.

Guidelines for students:

- Take two congruent rectangular tin/cardboard/ thick chart paper sheets where length is twice the breadth.

- Fold the first rectangular tin/cardboard/thick chart paper sheet along its length to form a hollow cylinder. Fix a circular base, whose circumference is equal to the breadth of the rectangle. Record the radius of the base and height of the resulting Cylinder.

- Similarly create another Cylinder by folding along its breadth. Record the dimensions of this second Cylinder.

- Calculate the volumes V_1 & V_2 of the two Cylinders using the formula :
  $V = \pi r^2 h$

- Repeat the same procedure for another set of congruent rectangles where length is thrice the breadth.

- Record the observations in the following table

(I) Rectangle Dimensions: $L \times B$; where $L = 2B$			
Case i	Case ii	Comparison by taking	
Cylinder obtained by folding along its length	Cylinder obtained by folding along its breadth	Positive Difference	Ratio
$r_1 =$ _____	$r_2 =$ _____	$V_1 - V_2$	$\dfrac{V_1}{V_2}$
$h_1 =$ _____	$h_2 =$ _____		
$V_1 =$ _____	$V_2 =$ _____		
(II) Rectangle Dimensions: $L \times B$; where $L = 3B$			
Case i	Case ii	Comparison by taking	
Cylinder obtained by folding along its length	Cylinder obtained by folding along its breadth	Positive Difference	Ratio
$r_1 =$ _____	$r_2 =$ _____	$V_1 - V_2$	$\dfrac{V_1}{V_2}$
$h_1 =$ _____	$h_2 =$ _____		
$V_1 =$ _____	$V_2 =$ _____		

- Compare the volumes of the two Cylinders formed by folding the rectangular tin/cardboard/ thick chart paper sheet along its length and breadth in both the cases.

- Explain how changes in dimensions impact the volumes of the Cylinders.

- Conclude by summarizing the key observations and inferences.

Learning Outcomes:

This activity will help the students to

- gain a practical understanding of how folding a rectangular tin /cardboard /thick chart paper sheet along its length and breadth affects the volumes of the resulting Cylinders.

- observe the impact of changes in dimensions on the volumes of the cylinders.

- connect geometric concepts with real-life applications and enhance their spatial reasoning skills.

Activity 6: To investigate the relationship between the dimensions of a Cuboid, its total surface area and volume.

Aim: To manipulate the dimensions of a Cuboid while keeping the total surface area fixed and observe how these changes affect the Cuboid's volume, specifically identifying a case where the volume is maximized.

Guidelines for students :

Three Dimensional Manipulations:

Manipulation 1 - Unequal dimensions ($l \neq b \neq h$):

- Prepare a Cuboid with all three dimensions l , b and h different .
- Calculate the Total Surface Area and Volume of the Cuboid.

Manipulation 2 – Any two dimensions equal ($l = b \neq h$):

- Prepare another Cuboid having same total surface area, by choosing any two dimensions equal and calculate the volume of the resulting Cuboid.

 Manipulation 3 – Equal dimensions (l = b = h):

- Set all three dimensions equal to create a Cube having same total surface area.

- Calculate the volume of the Cube.

- Record your observations in the table given below:

	Solid	Length	Breadth	Height	TSA	Volume
1	Cuboid					
2	Cuboid					
3	Cube					

- Observe the relationship between the dimensions and the volume when the total surface area is kept constant.

- Identify the manipulation that results in the maximum volume.

Learning Outcomes:

This activity will help the students to

- gain hands-on experience in manipulating dimensions of a Cuboid while keeping the total surface area fixed.

- observe how changes in dimensions impact the volume of the Cuboid.

- enhance their understanding of optimization in geometry.

- appreciate the mathematical concepts involved in achieving specific outcomes, such as maximizing volume while fixing the total surface area.

Activity 7: Fibonacci sequence and Golden rectangle

Aim: To explore patterns in numbers through the Fibonacci sequence and the golden rectangle and to understand their applications in real-life situations.

Guidelines for students:

- Explore the Fibonacci sequence as a series of numbers where each number is the sum of the two preceding ones: 0, 1, 1, 2, 3, 5, 8, 13, 21, ...

- Explore the concept of the golden ratio and the golden rectangle, which arises from the Fibonacci sequence.

- Explore the properties and patterns observed in the Fibonacci sequence, such as the golden ratio (approximately 1.618) and its occurrence in nature, art and architecture.

- Explore the properties and characteristics of the golden rectangle, including its proportions and aesthetic appeal.

- Explore applications of the golden ratio and golden rectangle in art, design, and aesthetics, such as in the compositions of paintings, sculptures, and architecture.

- Investigate examples of the golden ratio and Fibonacci sequence in nature, such as the spiral patterns of sunflowers, pinecones, and seashells.

- Construct a golden rectangle using the golden ratio and discuss the properties and aesthetic appeal of the constructed golden rectangle.

Learning Outcomes:

This activity will help the students to

- gain an understanding of the properties and patterns of the Fibonacci sequence and the golden rectangle.

- appreciate the applications of these mathematical concepts in various disciplines, including art, architecture and nature.

- foster creativity and critical thinking by exploring real-life examples and applications of mathematical patterns.

Activity 8: Pascal's Triangle

Aim: To explore Pascal's Triangle, identify patterns within Pascal's Triangle and understand their applications in real-life situations.

Guidelines for students:

- Explore Pascal's Triangle, its basic properties and its formation, where each number in the triangle is the sum of the two numbers directly above it.

- Explore the patterns within Pascal's Triangle, such as Fibonacci numbers, binomial coefficients and triangular numbers.

- Observe how Pascal's Triangle relates to various mathematical concepts like binomial expansions and probability.

- Create own variations of Pascal's Triangle such as rotating it, skipping rows or using different starting numbers.

- Create visual representations of Pascal's Triangle and its patterns, using diagrams or presentations.

- Prepare a report summarizing the project findings, including explanations of observed patterns and connections to other mathematical concepts.

Learning Outcomes:

This activity will help the students to

- gain an understanding of the properties and patterns of Pascal's Triangle.

- appreciate the applications of Pascal's Triangle in Probability and Algebra.

- foster critical thinking and problem-solving skills by exploring real-life examples and applications of mathematical patterns.

9. To measure Heights and Distances using a Clinometer.

Aim: To enable the students to measure the heights and distances of any object in real life scenarios using a Clinometer.
Guidelines for students:

- Explore the importance of measuring heights and distances accurately in various fields such as surveying, engineering and navigation.

- Prepare a clinometer- a tool to measure angles and know its basic working principle. (Video link is given below for reference) https://youtu.be/gHeiueRpX7U?si=-kaiAyxAL4tKc9fK

- Align the clinometer with the line of sight and measure the angle of elevation/depression.

- Calculate the height/distance of the object using trigonometric ratios.

- In case you want only angles of elevation of 30º, 45º or 60º then adjust your distance in front of the object till you obtain the above angles, then take the required measurement and find the height of the object.

Learning Outcomes:

This activity will help the students to

- enhance their understanding of trigonometric concepts and their practical applications in real-life scenarios.

- summarize the practical applications of using a clinometer in measuring heights and distances.

INTERNAL ASSESSMENT SCHEME   2025 - 2026

Sub: Mathematics (Level 1 and Level 2)
Grade 10

- A list of **9 activities** for **Internal Assessment** of **20 marks** are given.
- Student may choose **any one** activity based on his/her capacity.
- Guidelines for each activity is provided for students. Teacher is free to give additional guidelines.
- Each activity is allotted maximum 20 marks.
- **Record of the activity (hard/ soft copy) of each student has to be maintained, for scrutiny by the Board.**
- **Assessment criteria for the activities is given below**:

CRITERIA	MARKS
1) Model prepared/Data collection (accuracy, neatness, creativity)	4mks.
2) Computation (logarithms may be used for calculations)	4mks
3) Project report (Mathematical content, organisation , presentation, neatness, creativity, diagram if any, resources used)	4mks
4) Oral presentation (clarity, logical sequence, effective communication)	4mks
5) Viva (mathematical reasoning, critical thinking)	4mks
TOTAL	**20 MARKS**

Rubrics for Internal Assessment Activities for Grade 10

Criteria	Excellent (4)	Good (3)	Satisfactory (2)	Needs improvement (1)
Model prepared/ Data collected	The model is exceptionally attractive in terms of creativity, design and neatness	The model is attractive in terms of creativity, design and neatness	The model is acceptably attractive in terms of creativity, design and neatness	The model is not attractive in terms of creativity, design and neatness
	Data collected is exceptionally comprehensive and neatly organised	Data collected is comprehensive and neatly organised	Data collected is somewhat comprehensive and neatly organised	Data collected is not comprehensive and unorganised
Content, Resources, diagrams and computations	Extremely good content and resources used, Diagrams and computations are accurate	Good content and resources used, Diagrams and computations are mostly accurate	Content and resources used are satisfactory, Diagrams and computations are somewhat accurate	Content and resources used are unsatisfactory, Diagrams and computations are not accurate
Activity Report	Report is extremely well organised and written providing all the necessary details.	Report is well organised and written providing most of the necessary details	Report is satisfactorily organised and written providing few details.	Report is unorganised and written providing hardly any details
Oral presentation	Presented confidently with precise logical sequence and clarity	Presented with good confidence and acceptably precise logical sequence and clarity	Presented with logical sequence and clarity with satisfactory confidence	Not confidently presented and no logical sequence and clarity
Viva	Answered all the questions correct	One or two questions answered wrong.	Half of the questions answered wrong.	One or two questions answered correct

Competency Based Learning Outcomes

Sub: Mathematics   **Std: X**

Chapter Name and Serial No:	Learning Outcomes
1. Real Number	The learner ● Generalises properties of numbers and relations among them studied earlier to evolve results such as Fundamental theorem of Arithmetic and applies them to solve problems related to real life contexts. ● Finds LCM and HCF of the given two numbers ● Identifies and proves a given number is an irrational number
2. Polynomials	The learner ● Develops a relationship between algebraic and graphical methods of finding the zeroes of a polynomial

		● Verifies the relationship between the Zeros and coefficients of a Polynomial
3.	Pair of linear Equations in two variables	The learner ● Finds solutions of pairs of linear equations in two variables using algebraic methods and the graphical method. ● Solves problems related to real life context
4.	Quadratic Equations	The learner ● Demonstrates strategies of finding roots and determining the nature of roots of a quadratic equation ● Formulates and solves the word problems reducible to quadratic equations
5.	Arithmetic Progressions	The learner ● Identifies the A.P from the given patterns of numbers ● Applies the formulae of finding n^{th} term and sum of n terms of an A.P to solve problems ● Develops strategies to apply the concept of A.P to daily life situations
6.	Triangles	The learner ● Works out ways to differentiate between congruent and similar triangles ● Identifies similar triangles using the definition ● Applies criteria of similarity of triangles to prove two triangles are similar ● Applies the concept of similarity of two triangles to find unknown angles, lengths or perimeter. ● Establishes properties for similarity of two triangles logically using different geometric criteria established earlier such as Basic Proportionality Theorem etc.

7. Coordinate Geometry	The learner • Derives formulae to establish relations for geometric shapes in context of coordinate plane such as finding the distance between two given points, to determine the coordinates of a point between any two given points • Applies distance formula and section formula to solve the problems
8. Introduction to Trigonometry	The learner • Determines all trigonometric ratios with respect to a given acute angle of a right triangle • Finds the other trigonometric ratios when one of the ratio is given • Applies basic trigonometric identities to solve the problems
9. Some applications of Trigonometry	The learner • Identifies angle of elevation and angle of depression • Uses trigonometric ratios in solving problems in daily life contexts like finding heights of different structures or distance from them
10. Circles	The learner • Demonstrates that the tangent to a circle is special case of secant and only two tangents can be drawn to a circle • Derives proofs of theorems related to the tangents of a circle • Applies theorems to solve problems
11. Constructions	Chapter deleted
12. Areas related to circles	The learner

		● Understands and applies the formulae of area of sector and segments of circles to solve the problems ● Develops strategies to apply the concept of sector and segments of a circle to daily life situations
13.Surface Areas and Volumes		The learner ● Find surface areas and volumes of objects in the surroundings by visualising them as as a combination of different solids like cylinder and a hemisphere, combination of different cubes etc. ● Applies the knowledge to solve real life problems
14.Statistics		The learner ● Calculates mean, median and mode for different sets of data related with real life contexts
15.Probability		The learner ● Determines the probability of an event and applies the concept in solving daily life problems
16.Logarithms		The learner ● Understands and applies laws of logarithms to simplify the algebraic expressions ● Applies logarithms to solve real life problems

    b.

Revised Bloom's Taxonomy

The revised Bloom's taxonomy includes the following levels:

- **Remembering:** Exhibit memory of previously learned material by recalling facts, terms, basic concepts and answers.
- **Understanding:** Demonstrate understanding of facts and ideas by organizing, comparing, translating, interpreting, giving descriptions and stating main ideas.
- **Applying :** Solve problems to new situations by applying acquired knowledge, facts, techniques and rules in a different way.
- **Analysing:** Examine and break information into parts by identifying motives or causes. Make inferences and find evidence to support generalization.
- **Evaluating:** Present and defend opinions by making judgments about information, validity of ideas, or quality of work based on asset of criteria.
- **Creating:** Compile information together in a different way by combining elements in a new pattern or proposing alternative solutions.

DESIGN OF SSC FINAL EXAM QUESTION PAPER (2025-2026)

Subject : MATHEMATICS (E) - LEVEL 2 (Basic)

Time : 3 hrs   **Grade 10**   **Max. Marks :80**

****

The weightage or the distribution of marks over different dimensions of the question paper shall be as follows:

1.   Weightage to the Learning objectives

Sr. No.	Learning Objectives	Marks	Percentage of Marks
1.	Remembering and Understanding	54	67.5%
2.	Applying	15	18.75%
3.	Analysing , Evaluating and Creating	11	13.75%
	Total	**80**	**100%**

2.Weightage to the different areas of Content

Chapter No.	Topic	Marks
1.	Real Numbers	04
2.	Polynomials	04
3.	Pair of Linear Equations in Two Variables	09
4.	Quadratic Equations	08
5	Arithmetic Progressions	05
6.	Triangles	06
7.	Coordinate Geometry	06
8.	Introduction to Trigonometry	07
9.	Some Applications of Trigonometry	03
10.	Circles	04
11.	Areas Related to Circles	05
12.	Surface Areas and Volumes	06
13.	Statistics	06
14.	Probability	03
PDF	Logarithms	04
	Total	**80**

3.   Weightage to different form/type of Questions

Sr. No.	Form of Questions	Marks for each question	Number of questions	Total Marks
1.	Very Short Answer Type (VSA)	1	20	20
2.	Short Answer Type I (SA-I)	2	11	22
3.	Short Answer Type II (SA-II)	3	10	30
4.	Long Answer Type (LA)	4	2	08
	Total		**43**	**80**

4.   The expected time for different type of questions would be as follows:

Sr. No.	Form of Questions	Approx. time for each question in mins (t)	Number of questions (n)	Approx. time for each form of questions in mins (t) x (n)
1.	Very Short Answer Type (VSA)	2	20	40
2.	Short Answer Type I (SA-I)	3	11	33
3.	Short Answer Type II (SA-II)	8	10	80
4.	Long Answer Type(LA)	13.5	02	27
	Total		**43**	**180**

5.   Weightage to difficulty level of questions:

Sr. No.	Estimated difficulty level of questions	Percentage
1.	Easy	25%
2.	Average	60%
3.	Difficult	15%
	Total	**100%**

6.   Number of Questions:

There will be **43** questions

NOTE: Figures outside the bracket indicate the question number and figures within the bracket indicate marks .

*In the topic of "**Pair of Linear equations in two variables**" , Word problem **OR** Finding the solution of a pair of linear equations in two variables by Graphical method may be tested. (Question no. 43)

* Indicates any one concept will be tested from that chapter

This is a model Blueprint, paper setter may make changes in the objectives chapter

GOA BOARD OF SECONDARY AND HIGHER SECONDARY EDUCATION

ALTO-BETIM GOA   403521

GRADE 10   **MARCH 2026 EXAM**

MODEL PAPER

SUBJECT : MATHEMATICS (E) – (BASIC)

Time : 3 hrs   **Max. Marks: 80**
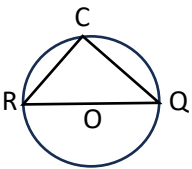

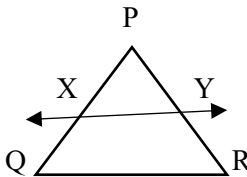

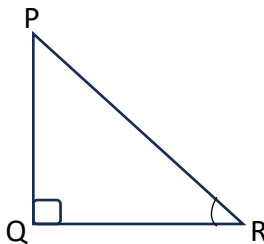

GENERAL INSTRUCTIONS:

Read the following instructions very carefully and follow them :.
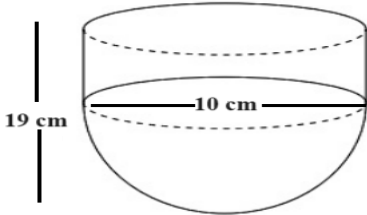

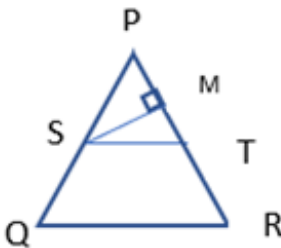

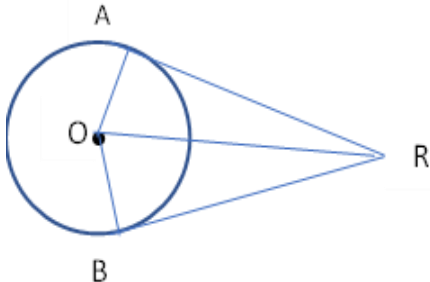

i)   This question paper consists of **43** questions. All questions are compulsory.

ii)   The question paper is divided into four Sections A**, B, C,** and **D**.

iii)   In **Section A**, question numbers **1 to 18** are multiple choice questions **(MCQs)** and   question numbe**rs 19 and 20** are Assertion – Reason based questions of **1 mark** each.

iv)   In **Section B**, question numbers **21 to 31** are short answer type I **(SA-I)** questions carrying **2 marks** each.

v)   In **Section C**, question numbers **32 to 41** are short answer type II **(SA-II)** questions carrying **3 marks** each.

vi)   In **Section D**, question numbers **42 and 43** are long answer **(LA)** questions carrying **4 marks** each.

vii)   There is no overall choice. However, an internal choice has been provided in **two questions** of **2 marks** each in **Section B** and **two questions** of **3 marks** each in Section C.

viii)   Logarithm and Antilogarithm tables are printed on the last page of the question paper.

ix)   Use of calculator is NOT permitted.
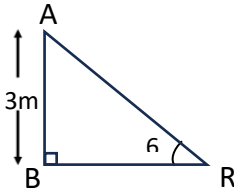

Section A (1 mark each)

	Select and write the correct alternative from those given below each statement for question 1 to 18:
1	The irrational number from the following is: ● $3\sqrt{3}$ ● $\sqrt{3 \times 3}$ ● $3\sqrt{3^2}$ ● $3 + \sqrt{9}$
2	If the product of two numbers is 315 and their HCF is 3, then their LCM is: ●15 ● 45 ● 105 ● 945
3	The sum of the zeros of the quadratic polynomial $6x^2 – 14x + 4$ is: ● $\dfrac{-7}{3}$ ● $\dfrac{-2}{3}$ ● $\dfrac{2}{3}$ ● $\dfrac{7}{3}$
4	If $19x + 17y = 55$ and $17x + 19y = 53$, then the value of x – y is: ● 1 ● 3 ● -1 ● -3
5	If the quadratic equation $ax^2 + bx + c = 0$ has no real roots, then: ● $b^2 – 4ac > 0$ ● $b^2 – 4ac = 0$ ● $b^2 – 4ac < 0$ ● $b^2 – 4ac \geq 0$
6	If one of the roots of the quadratic equation $2x^2 − px + 4 = 0$ is 2, then the value of p is: ● - 6 ● 2 ● 4 ● 6
7	The common difference for the AP: -5, -1, 3,…….is: ● 4 ● - 4 ● 6 ● - 6

8	The coordinates of the midpoint of the line segment joining the origin and the point P(4, 6) are: ● (0, 6) ● (4, 0) ● (2, 3) ● (-2, -3)
9	If $sin^2 B + cos^2 52°= 1$, where B is an acute angle, then the value of B is : ● 26° ● 38° ● 48° ● 52°
10	If $2\sin\theta = \sqrt{3}$ then the value of θ is : ● 30° ● 45° ● 60° ● 90°
11	The circumference of a circle is 22 cm. If the central angle of a sector of the circle is 144°, then the area of the sector is : A) 12.6 cm² B) 15.4 cm² C) 18.7cm² D) 9.5 cm²
12	The total surface area of a solid hemisphere of radius 1 cm is : ● $\frac{2}{3}\pi$ cm² ● 2π cm² ● 3π cm² ● $\frac{4}{3}\pi$ cm²
13	If a letter is chosen at random from the letters of the English alphabet, then the probability that it is a letter of the word ADDITION is: ● $\frac{2}{13}$ ● $\frac{3}{13}$ ● $\frac{4}{13}$ ● $\frac{5}{26}$
14	The value of $\log_{10} 1$ is : ● 0 ● 0.1 ● 1 ● 10
15	If α and β are the zeros of a quadratic polynomial such that $\alpha + \beta = 15$ and $\alpha - \beta = 9$. The quadratic polynomial having α and β as its zeros is : ● $x^2 +15x + 36$ ● $x^2 -15x + 36$ ● $x^2 - 9x + 15$ ● $x^2 + 9x + 15$
16	In the figure, RQ is the diameter of the circle. Therefore the value of tan R × tan Q is: ● $\frac{1}{\sqrt{3}}$ ● 1 ● $\sqrt{3}$ ● 3
17	AX and AY are tangent segments from external point A to a circle with centre O . If ∠XAY =100° , then ∠XYO is : ● 40° ● 50° ● 80° ● 100°
18	The perimeter of the wall-hanging in the form of a sector with radius 10.5 cm and sector angle 60º is: ● 48 cm ●96 cm ● 64 cm ● 32 cm
	Directions : **In Q. No. 19 and 20, a statement of Assertion(A) is followed by a statement of Reason(R) . Select and write the correct option from the following :** • Both, Assertion (A) and Reason (R) are true. Reason (R) explains Assertion (A) completely. • Both , Assertion (A) and Reason (R) are true . Reason (R) does not explain Assertion (A). • Assertion (A) is true but Reason (R) is false. • Assertion (A) is false but Reason (R) is true.

19	Assertion (A): The pair of linear equations $5x + 2y + 6 = 0$ and $7x + 6y + 18 = 0$ have infinitely many solutions. Reason (R) : The pair of linear equations $a_1x + b_1y + c_1 = 0$ and $a_2x + b_2y + c_2 = 0$ have infinitely many solution if $$\frac{a1}{a2} = \frac{b1}{b2} = \frac{c1}{c2}$$
20	Assertion (A): D and E are points on the sides AB and AC respectively of a $\triangle ABC$ such that DE $\parallel$ BC then the value of x is 4, when AD = x cm, DB = (x –2) cm, AE = (x + 2) and EC = (x –1) cm. Reason (R) : If a line is parallel to one side of a triangle then it divides the other two sides in the same ratio.

Section B (2 marks each)	
21	Find the LCM of 330 and 242 by prime factorization method.
22	Write a polynomial in 'x' whose zeros are $-\dfrac{3}{2}$ and $\dfrac{4}{5}$
23	Find the sum of first 15 terms of the Arithmetic Progression : 6, 13, 20,…
24	The 10th term of an Arithmetic Progression is 52 and the 15th term is 77. Find the first term.
25	In triangle PQR, XY // QR, such that P-X-Q and P-Y-R If $\dfrac{PX}{QX} = \dfrac{3}{5}$ then find the value of $\dfrac{QR}{XY}$
26	Find the distance between the points A(5 , -7) and B (2 , -3). **OR** Point P(x, y) divides the line segment joining points A(3, 7) and B(-5, 2) in the ratio 3 : 2 . Find the values of 'x' and 'y'.
27	In ΔPQR , $\angle$ PQR = 90° and $\tan R = \dfrac{8}{15}$. Find the length of PR and the value of sec P. **OR** Evaluate the following expression using known numerical values of trigonometric ratios : $$\frac{cos^2 30°}{1+cosec^2 45°}$$

28	Prove the trigonometric identity :
	$$\cot A + \tan A = \sec A \csc A$$

29	A vessel is in the form of a hollow cylinder mounted on a hollow hemisphere. The diameter of the hemisphere is 10 cm and the total height of the vessel is 19 cm. Find the inner surface area of the vessel. (Take $\pi = 3.14$)

30	The table given below shows marks scored by 40 students in a maths test. Find the median of the data.

Marks	No of students
0 – 10	2
10 – 20	8
20 – 30	16
30 – 40	8
40 – 50	6

31	A box contains cards bearing numbers 1,2,3,4, ………, 20. A card is drawn at random from the box. Find the probability that the number on the card drawn is :
	(i) a prime number
	(ii) divisible by 2 or 3

	Section C (3 marks each)
32	Find the solution of the pair of linear equations 3x + 4y = 10 and 5x – 2y = 8 by Elimination method.
	OR
	Find the solution of the pair of linear equations 3x – y = 2 and 5x – 2y = 1 by Substitution method.
33	Find the roots of the quadratic equation $6x^2 - 19x + 8 = 0$ by Factorisation Method.
34	Find the roots of the quadratic equation $3x^2 + 8x + 5 = 0$ by using the Quadratic Formula.
35	In triangle PQR, ST // QR, SM ⊥ PR, Show that: $\dfrac{PS}{SQ} = \dfrac{PT}{TR}$
36	In the figure, O is the centre of a circle with a radius 6cm. R is a point in the exterior of a circle, such that OR=10cm. RA and RB are tangents to the circle. Find the length of the tangents at points A and B.

37	A chord of a circle of radius 14cm subtends an angle of 90° at the centre. Find the area of the major segment of the circle. (Take $\pi = \frac{22}{7}$)
38	A ladder is placed against a pole AB such that its upper end is touching the top of the pole. If the pole is 3m high and the ladder makes an angle of 60° with the horizontal, then find the length of the ladder. (Take $\sqrt{3} = 1.73$)
39	A solid wooden toy is in the shape of a right circular cone mounted on a hemisphere. If the radius of the hemisphere is 4.2 cm and the total height of the toy is 10.8 cm, find the volume of the wooden toy. (Take $\pi = \frac{22}{7}$) OR An iron pillar has some part in the form of a right circular cylinder and remaining in the form of a right circular cone. The radius of the base of each of cone and cylinder is 8 cm. The cylindrical part is 240 cm high and the conical part is 36 cm high. Find the total surface area of 20 such pillars. (Take $\pi = \frac{22}{7}$)
40	Evaluate the following expression by using the logarithm method. $$\frac{\sqrt{40.87} \times (0.563)^2}{0.0879}$$
41	If P(2, -1), Q(7, 3) and R(k, 4) are the vertices of an isosceles triangle with PQ = PR, then find the value of 'k'.

	Section D (4 marks each)				
42	The table given below shows the daily expenditure of some families in a village.				

Daily Expenditure	No of families	Class mark x_i	$d_i = x_i - a$	$f_i d_i$
0 – 100	4			
100 – 200	7			
200 – 300	11			
300 – 400	8			
400 – 500	7			
500 – 600	3			
Total	$\sum f_i = $ _____			$\sum f_i d_i = $ _____

Rewrite and complete the table and find the mean daily expenditure of the families by taking 'a' as the assumed mean of the interval 300-400 using the assumed mean method.

43	The sum of the digits of a two-digit number is 12. The number obtained by interchanging the two digits exceeds the given number by 18. Find the number.

****

ALTO-BETIM   GOA   403521

DESIGN OF SSC FINAL EXAM QUESTION PAPER   (2025-2026)

Subject : MATHEMATICS (E) - LEVEL 1 (Standard)

Time : 3 hrs   **Grade 10**   **Max. Marks :80**

****

The weightage or the distribution of marks over different dimensions of the question paper shall be as follows:

1.   Weightage to the Learning objectives

Sr. No.	Learning Objectives	Marks	Percentage of Marks
1.	Remembering and Understanding	44	55%
2.	Applying	19	24%
3.	Analysing , Evaluating and Creating	17	21%
	Total	**80**	**100%**

2.Weightage to the different areas of Content

Chapter No.	Topic	Marks
1.	Real Numbers	04
2.	Polynomials	04
3.	Pair of Linear Equations in Two Variables	09
4.	Quadratic Equations	08
5	Arithmetic Progressions	05
6.	Triangles	06
7.	Coordinate Geometry	06
8.	Introduction to Trigonometry	07
9.	Some Applications of Trigonometry	03
10.	Circles	04
11.	Areas Related to Circles	05
12.	Surface Areas and Volumes	06
13.	Statistics	06
14.	Probability	03
PDF	Logarithms	04
	Total	**80**

3.   Weightage to different form/type of Questions

Sr. No.	Form of Questions	Marks for each question	Number of questions	Total Marks
1.	Very Short Answer Type (VSA)	1	20	20
2.	Short Answer Type I (SA-I)	2	9	18
3.	Short Answer Type II (SA-II)	3	10	30
4.	Long Answer Type (LA)	4	3	12
	Total		**42**	**80**

4.   The expected time for different type of questions would be as follows:

Sr. No.	Form of Questions	Approx. time for each question in mins (t)	Number of questions (n)	Approx. time for each form of questions in mins (t) x (n)
1.	Very Short Answer Type (VSA)	2	20	40
2.	Short Answer Type I (SA-I)	3	9	27
3.	Short Answer Type II (SA-II)	8	10	80
4.	Long Answer Type(LA)	11	03	33
	Total		**42**	**180**

5.   Weightage to difficulty level of questions:

Sr. No.	Estimated difficulty level of questions	Percentage
1.	Easy	20%
2.	Average	60%
3.	Difficult	20%
	Total	**100%**

6.   Number of Questions:

There will be **42** questions

Goa Board of Secondary and Higher Secondary Education
Blue Print of SSC Final Exam Question Paper 2025-2026

NOTE: Figures outside the bracket indicate the question number and figures within the bracket indicate marks.

*In the topic of "**Pair of Linear equations in two variables**" , Word problem **OR** Finding the solution of a pair of linear equations in two variables by Graphical method may be tested. (Question no. 41)

*Indicates any one concept will be tested from that chapter

This is a model Blueprint, paper setter may make changes in the objectives chapter wise.

GOA BOARD OF SECONDARY AND HIGHER SECONDARY EDUCATION
ALTO-BETIM GOA 403521

GRADE 10   MARCH 2026 EXAM

MODEL PAPER

SUBJECT : MATHEMATICS (E) - (REGULAR)

TIME : 3 Hrs   MAX. MARKS : 80

GENERAL INSTRUCTIONS:

Read the following instructions very carefully and follow them :
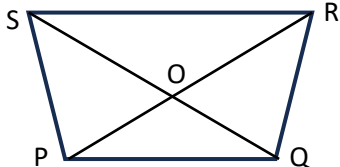

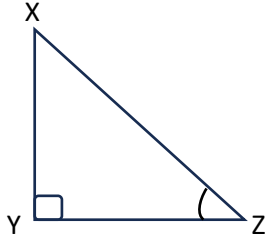

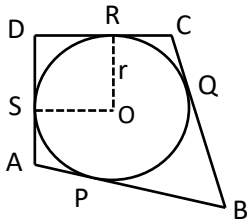

i)   This question paper consists of **42** questions. All questions are compulsory.

ii)   The question paper is divided into four Sections A**, B, C** and **D**.

iii)   In **Section A**, question numbers **1 to 18** are multiple choice questions **(MCQs)** and   question numbers **19 and 20** are Assertion – Reason based questions of **1 mark** each.

iv)   In **Section B**, question numbers **21 to 29** are short answer type I **(SA-I)** questions carrying **2 marks** each.

v)   In **Section C**, question numbers **30 to 39** are short answer type II **(SA-II)** questions carrying **3 marks** each.

vi)   In **Section D**, question numbers **40 to 42** are long answer **(LA)** questions carrying **4 marks** each.

vii)   There is no overall choice. However, an internal choice has been provided in **two questions** of **2 marks** each in **Section B** and **two questions** of **3 marks** each in **Section C**.

viii)   Logarithm and Antilogarithm tables are printed on the last page of the question paper.

ix)   Use of calculator is NOT permitted.
	SECTION A (1 mark each)
	Select and write the correct alternative from those given below each statement for question 1 to 18 :
1	The number 200 when expressed as product of prime numbers is written as: 5×2^4 $5^3 \times 2^2$ $5^3 \times 2^3$ $5^2 \times 2^3$
2	If the product of two numbers is 1690 and their HCF is 13 , then their LCM is: 13 130 169 2197
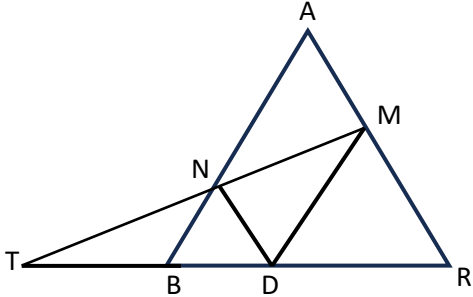

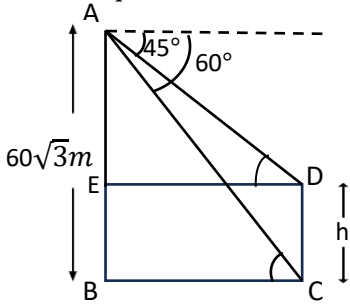

3	A quadratic polynomial in 'x' whose zeros are $\frac{3}{2}$ and 5 is:
	• $x^2 + 13x + 15$
	• $x^2 - 13x + 15$
	• $2x^2 + 13x + 15$
	• $2x^2 - 13x + 15$
4	If $x + y = 5$ and $x - y = 1$ then the value of $\frac{x}{y}$ is:
	• $\frac{-3}{2}$
	• $\frac{-2}{3}$
	• $\frac{2}{3}$
	• $\frac{3}{2}$
5	If the discriminant of the quadratic equation $3x^2 - 10x + k = 0$ is 196 then the value of k is:
	• -8
	• 7
	• 8
	• 14
6	The 27th term from the last term of the AP: 3, 8, 13,......, 253 is:
	• 116
	• 123
	• 153
	• 162
7	The ratio in which the point $(-1, 6)$ divides the line segment joining the points A$(-3, 10)$ and B$(6, -8)$ internally is:
	• 2 : 1
	• 1 : 2
	• 2 : 7
	• 7 : 2
8	If 3cos A= 5 then the value of sec A is:
	• $\frac{3}{5}$
	• 1
	• $\frac{5}{3}$
	• 2

9	GF and GH are two tangents drawn from an external point G of a circle with centre O. If ∠FGO=55° , then ∠ FOH is: • 35° • 40° • 70° • 110°
10	Point P is at a distance of 13 cm from the centre O of a circle with a radius of 5 cm. The length of the tangent segment from point P to the circle is: • 8 cm • 12 cm • 25 cm • 144 cm
11	If the circumference and the area of a circle are numerically equal then the diameter of the circle is: • 1 cm • 2 cm • 3 cm • 4 cm
12	Two cubes of side 3 cm are joined end to end. Therefore the surface area of the resulting cuboid is: • 45 cm^2 • 54 cm^2 • 90 cm^2 • 108 cm^2
13	Which of the following can be the probability of an event? • $\dfrac{0.1}{0.001}$ • $\dfrac{0.03}{0.3}$ • $\dfrac{0.5}{0.05}$ • $\dfrac{1.3}{1.2}$
14	The value of $\log_2 8 + \log_2 4$ is: • 3 • 4 • 5 • 6

15	If the product of zeros of the quadratic polynomial $9x^2 - kx - 6$ is twice the sum of zeros , then the value of k is: -3 -2 2 3
16	If $x + 1$, $3x$ and $4x + 2$ are the first three terms of an AP , then the fourth term is: 15 17 19 21
17	The value of $5tan^2\theta - 5\,sec^2\theta$ is: -5 0 1 5
18	A pendulum swings through an angle of 30° and describes an arc 8.8 cm in length. The length of the pendulum is: 15 cm 15.5 cm 16 cm 16.8 cm
	Directions : **In Q. No. 19 and 20, a statement of Assertion(A) is followed by a statement of Reason(R) .** **Select the correct option from the following options :** - Both, Assertion (A) and Reason (R) are true. Reason (R) explains Assertion (A) completely. - Both , Assertion (A) and Reason (R) are true . Reason (R) does not explain Assertion (A). - Assertion (A) is true but Reason (R) is false. - Assertion (A) is false but Reason (R) is true.
19	Assertion (A) : The lines for the pair of linear equations $5x + 2y + 6 = 0$ and $10x + 4y - 7 = 0$ are parallel. Reason (R) : The pair of linear equations $a_1x + b_1y + c_1 = 0$ and $a_2x + b_2y + c_2 = 0$ are called inconsistent pair of equations if $\frac{a_1}{a_2} = \frac{b_1}{b_2} \neq \frac{c_1}{c_2}$

20	Assertion (A) : X and Y are points on the sides AB and AC respectively of a ΔABC such that AX = 5.7 cm , XB = 9.5 cm , AY = 4.8 cm and YC = 8 cm , then XY is not parallel to BC.
	Reason (R) : If a line divides any two sides of a triangle in the same ratio , then it is parallel to the third side.

	SECTION B (2 marks each)
21	In the figure , PQRS is a trapezium in which PQ ∥ SR and its diagonals intersect at O. If OR = (3x−1) cm , OP= 5 cm , OS = (2x+3) cm and OQ = 7 cm , then find the value of x.

22	Find the value of 'k' if the point P(3 , -2) is equidistant from the points A(5 , k) and B(k , -4).
	OR
	If the distance between the points P(k , 5) and Q (3 , -7) is 13 sq. units , then find the value of k .

23	In ΔXYZ , ∠ XYZ = 90° and cot Z = $\frac{2}{\sqrt{5}}$. Find the length of XZ and the value of cosec X.

	OR
	Evaluate the following expression using known numerical values of trigonometric ratios : $1+ cosec^2\ 60° - \frac{3}{4} sec^2\ 45°$

24	ABCD is a quadrilateral such that $\angle D = 90°$. A circle with centre O touches the sides AB , BC , CD , and DA at P , Q , R and S respectively. If BC = 39cm , CD = 25 cm and BP = 28 cm , find the radius of the circle.

25	An ice cream cone consists of a cone with a hemispherical shape on top filled with ice cream. The conical part has a height of 4cm and a diameter of 6cm, as shown in the figure . Find the total volume of the ice cream . (Do not substitute the value of π)

26	In a school there are two sections , namely A and B of class X. Section A has 42 students and Section B has 48 students. Find the minimum number of books required for their class library so that they can be distributed equally among students of section A or section B.
27	Find the zeros of the quadratic polynomial $x^2 - 8x + 12$ and verify the relation between the zeros and the coefficients.
28	If the median height of 50 students in a class, based on the following frequency distribution, is 144 cm, find the missing frequencies x and y.

Height (in cm)	125-130	130-135	135-140	140-145	145-150	150-155	155-160
No. of students	2	4	x	y	8	9	5

29	A pack of 52 playing cards has the black kings, the queen of diamonds and the jack of spades removed. After reshuffling the remaining cards, one card is drawn at random. Find the probability that the drawn card is: (i) a red card (ii) a face card

	SECTION C (3 marks each)
30	Find the solution of the pair of linear equations $5x + 2y = 16$ and 7x – 3y = 34 by Elimination method . OR Find the solution of the pair of linear equations $2x + 3y = 4$ and $3x - y = -5$ by Substitution method.
31	Find the roots of the quadratic equation $6x^2 - 19x + 10 = 0$ by Factorisation method . OR Find the roots of the quadratic equation $2x^2 - 8x + 7 = 0$ by using the Quadratic formula.
32	A flower bed contains rows of rose plants, with the number of plants in each row decreasing by 2. The first row has 43 rose plants, the second row has 41, and so on, until the last row, which has 11 rose plants. How many rows are there in the flower bed?

33	A cow is tied to a rope with a length of 12 m at the corner of a rectangular field with dimensions 25 m x 45 m. If the length of the rope is increased to 23 m, then find the additional grassy area that the cow will be able to graze. (Take π=$\frac{22}{7}$)
34	D is any point on side BR of ΔABR. DM∥ AB and DN∥ AR , A-N-B and A-M-R . MN and RB meet at T when produced. Prove that : $TD^2 = TB \times TR$
35	Prove the trigonometric identity : $\frac{1+sec\theta-\tan\theta}{1+sec\theta+\tan\theta} = \frac{1-sin\theta}{cos\theta}$
36	From the top of a cliff AB 60$\sqrt{3}$ m high , the angles of depression of the top and bottom of a tower DC are 45° and 60° respectively. Find the height of the tower.
37	A toy is shaped like a right circular cylinder with a hemisphere at one end and a cone at the other. The cylindrical part has a height of 13 cm and a radius of 5 cm. The hemispherical and conical parts have the same radius as the cylindrical part, and the conical part has a height of 12 cm. Calculate the cost of painting the toy at ₹8.50 per cm². (Take π = $\frac{22}{7}$)
38	Evaluate the following expression by using the logarithm method. $\sqrt{\frac{(3.68)^3 \times 0.0072}{9.253}}$
39	If A(−2 , y) , B(−4,−2) , C (x , −2) and D(7,3) are the vertices of a parallelogram taken in order, then find the length of the diagonal AC.

SECTION D (4 marks each)

40 The table below shows the number of people in various age groups attending a yoga camp.

Age group C.I	No. of people (f_i)	Class mark (x_i)	$u_i = \dfrac{x_i - a}{h}$	$f_i u_i$
20 – 30	36			
30 – 40	28			
40 – 50	16			
50 – 60	10			
60 – 70	7			
70 – 80	3			
Total	$\sum f_i =$ __			$\Sigma f_i u_i =$ __

Taking the class mark denoted by 'a' of the class interval $40-50$ as the assumed mean , rewrite and complete the table and then calculate the average age of the people attending the camp using the step deviation method.

41 A train covered a certain distance at a uniform speed. If the train had been 6 km/h faster, it would have taken 4 hours less than the scheduled time. If the train had been 6 km/h slower, it would have taken 6 hours more than the scheduled time. Find the distance covered by the train.

42 A piece of cloth costs ₹1080. If the piece was 3 metres longer and each meter of cloth cost ₹60 less, the cost of the piece would remain unchanged. Find the length of the piece and its original rate per metre.

****
